96-9171

1. kwalker 4/27/2004 Overlapping Right

Comment: While reviewing this application I found that the applicants already have a licensed right for 20 acres and 0.40 cfs from Coburn Creek for irrigation in SESW, S01 (Right 96-9156). In light of this, I recommend we reduce the acreage in the SESW, S01 to 20 acres rather than allow 31 as applied for. This would allow the applicant to develop the entire 40 acres parcel if they wish to.

I also found the standard season of use in this area to be 4/1 to 10/31 so have updated the permit to this season.

Also added fish screening and velocity conditions even though not requested by fish and game.
