

MEMORANDUM

Date: October 10, 2008
To: Water Right File 63-33118
From: slester
Re: Comment/Analysis

Application 63-12418 was filed in 1997 but lingered in Bs 63 Moratorium hold until lately. Original applicant assigned portion to Toolson 3/2008. Original applicant did not respond to request for more information and that remaining portion - now reflected in 63-12418 - was voided per 9/8/2008 preliminary order (now final order). Toolson portion of original is 63-33118 (did not use regular split process for 2 new numbers to preserve easier tracks for following fate of leftover portion 63-12418). Drilling fee upgrade paid for existing domestic well with amended application filed by Toolson. Needed amended version to show Toolson well instead of original P/D. Yard irrigation is part of Toolson irrigation use. Stockwater assignment of 0.005 cfs treated as 0.01 cfs for database standards, likewise total assignment of 0.145 cfs treated as 0.15 cfs. Toolson amended application does not include an expansion so original priority is preserved.
