Keith,

I visited the Carpenter property today and talked with both Clint and Debra. Cable Creek is a fish bearing stream (saw some fish while there); however, they have provided fish passage. I asked them to make a slight adjustment – deepen the drop pool at the pond outlet by adding some rocks to deepen the pool or lower the dam at the outlet so the drop would be no greater than one foot – they were agreeable to this adjustment. With this adjustment fish passage will be sufficient. After reviewing this project today, IDFG has no objection to the application.
