Re: Application for Amendment of Permit No. 63-31362
Silver Spur Ranch Subdivision, Canyon County, Idaho
Application for Permit
Silver Spur Ranch Subdivision No. 2, Canyon County, Idaho

Dear Mr. Lester:

In accordance with our recent discussion, we are submitting an Application for Amendment of Permit No. 63-31362 for Silver Spur Subdivision located in Canyon County, Idaho. The original permit only included one 12-inch well as the point of diversion when in fact the point of diversion is two 12-inch wells located on the same subdivision lot. Drilling permits were submitted for both of these wells but only one well was included in the permit to appropriate public waters. Therefore, this Application for Amendment of Permit No. 63-31362 is intended to include the second well as a point of diversion.

The new Application for Permit is to increase the water right for the existing two wells in order to serve 123 additional lots in the adjacent Silver Spur Subdivision No. 2. The wells have the capacity to provide for an additional 0.96 cfs as shown in the attached Well Completion Report as prepared by Terry Scanlan in November of 2002. At least one of the existing submersible pumps will probably have to be replaced in order to accommodate this increased flow. The 0.96 cfs requested includes a component to allow up to ½ acre of lawn/landscape irrigation per lot for the 123 lots within Silver Spur Subdivision No. 2. The system will also have the capability to provide for a fire flow of 1,000 gpm if needed.

Thank you for your help and considerations. If you have any questions or need additional information, please let us know.

Sincerely,

Robert P. Walker, P.E.
