

MEMORANDUM

TO: Transfer Nos. 73812, 73813, 73814, and 73815 Files

FROM: Cynthia Bridge Clark

DATE: May 20, 2008

RE: Telephone Conversation

I spoke with the Jim Carey on April 25, 2008 to explain issues related to the above referenced transfer applications. I explained that several changes and corrections are required to complete the applications. In particular, I requested evidence of beneficial use of water on the property in the last five years. I explained that an answer to question no. 10, Part 1, of the transfer application was not provided and available satellite imagery indicated the property has not been irrigated in several years.

Mr. Carey contacted me May 20, 2008 to discuss what information is required to process the transfer applications. We reviewed the points of our previous discussion and the need for information regarding the use of water on the property in the last five years. He mentioned that he acquired the property about five years ago and did not think the land had been farmed because there were plans to subdivide. He said he needed to do research and would get back to me.
