RE: Water Appropriation Permit 22-7114

Notice of Intent to Void Permit

Dear Permit Holder(s):

On February 25, 1975, the Idaho Department of Water Resources (IDWR) issued water appropriation permit 22-7114 (permit) authorizing the development of a water right to divert 20.0 cfs of water from Canyon Creek for the irrigation of 1,702 acres in Madison County. A condition of approval requires "That the permit holder install and maintain a measuring device of a type approved by the Department as part of the diverting works." Under the terms of the permit, the development was to have been completed and a proof of beneficial use statement was to have been received by March 1, 1978. A request for extension of time was later approved postponing the proof of beneficial use due date to August 1, 1980. Proof of beneficial use was received by IDWR on July 9, 1980, thereby ending the authorized development period under this permit.

IDWR has diversion records for water pumped from Canyon Creek under rights in the name of Steveco Canyon Farms from 1978 to present (see attached graph and records). The greatest diversion rate during the authorized development period, 1975 to 1980, was 10.0 cfs in 1978. State Water District No. 1 (WD 01) staff have informed IDWR that measuring devices have not been maintained at the point of diversion from Canyon Creek as required by the permit. Prior licensed water rights 22-7069, 22-7103, and 22-7230 are claimed in the Snake River Basin Adjudication (SRBA) and recommended with a combined rate limit of 12.94 cfs for the irrigation of 2,725.4 acres. These rights overlap entirely the place of use authorized for irrigation by permit 22-7114. Since no beneficial use of water was developed under permit no. 22-7114 above and beyond prior water rights during the authorized development period and the permit holder has not complied with all conditions of approval, the permit will be voided.

The final step in the water appropriation process is the issuance of a Water Right License. By issuing a license, IDWR recognizes that you have met the requirements for establishing a water right. If you have not developed a beneficial use of water within the development period authorized by your permit, however, no water right has been established, and no license can be issued. Once the development period authorized by your permit expires, your permit cannot be retained to cover future development of the resource.

If you believe a water right license should be issued to you, please supply information to demonstrate that you established a beneficial use of water by July 9, 1980, in accordance with permit 22-7114 above and beyond uses authorized by existing water rights. If I do not receive the requested information from you within thirty (30) days, I will take action to void your permit under the provision of Section 42-219(8), Idaho Code. If you agree that no beneficial use of water occurred under permit 22-7114, you can shorten the voiding process by completing the enclosed relinquishment form and returning it to IDWR.

If you have any questions, please contact me at (208) 287-4943.

Respectfully,

Aaron Marshall
Sr. Water Resource Agent

Enclosure(s)
