Re: Requests for Extension of Time regarding Permit Nos. 63-12525 through 63-12531, in the name of Irving J. Ray

Dear Ms. Strate:

*
See correction below
↓
Enclosed are four original Requests for Extension of Time ("request(s)") you filed with the department for permits in the name of Irving J. Ray. Requests referring to permit nos. 63-12525, 63-12526 & 63-12531 are not appropriate. These three numbers refer to applications presently being reviewed for issuance of a permit. Additionally, your request for permit no. 63-12530 is not appropriate, because this permit has been assigned to the new owners Joseph & Laura Gallia. (Mr. and Mrs. Gallia have filed a request on their own behalf.) Therefore, I am returning these four requests to you. With this letter I am asking that the \$50.00 filing fee you paid for each of these requests be refunded to you. A check will be issued and mailed to you in 7-10 days.

You also filed three requests regarding permit nos. 63-12527 through 63-12529. These requests are acceptable and the department recognizes Michael Hitchcock, Vice President of Irving J. Ray, Inc. as having signatory powers for Mr. Ray. I will process these requests, assign a new proof deadline, and send a confirmation letter with a copy of the approved request to Mr. Hitchcock.

If you have any questions, please contact me at (208) 287-4942.

Sincerely,

Deborah J. Gibson

CHUKAR POINT SUBDIVISION IRRIGATION WATER RIGHTS

Steve Lester
IDWR Western Region
April 27, 2005

LOT #	WATER RIGHT STATUS
1	PERMIT 63-12529: 1 well for about 45 gpm (0.10 cfs) to irrigate 5 acres, must provide annual mitigation by leasing 15 acre-feet from Boise River storage or cannot divert from well. It is possible that a 10 year lease has been secured. Contact Boise River Watermaster Lee Sisco for lease information, 378-0246. Conceivably another more long-term mitigation plan could be proposed to and approved by IDWR in lieu of leasing storage water.
2	PERMIT 63-12530: same provisions as in Lot 1 Permit
3	LICENSE 63-31948: 2 wells for about 130 gpm (0.29 cfs) to irrigate 14.7 acres in Lots 3 & 4, does not require annual or other mitigation
4	See Lot 3 information, same License
5	PERMIT 63-12527: same provisions as in Lot 1 Permit
6	PERMIT 63-12528: same provisions as in Lot 1 Permit
7	APPLICATION for PERMIT 63-12525: pending , not authorized to divert any irrigation water until a valid mitigation plan is approved by IDWR to allow application processing to resume for possible approval.

Sale of Land and update of IDWR records for new owner:

- Forms available at www.idwr.idaho.gov
- Application/Permit (not appurtenant to land) – current applicant or permit holder assigns application or permit to new owner (“assignment” form)
- License (is appurtenant to land) – new owner files ownership update with IDWR (“notice of change in water right ownership” form)
