Comments:

1. slester 7/13/2005 11:37:46 AM Special Administration Area Notes

Comment: Special Administration Areas : Basin 63 processing delay

Exempt: Y

Reason: Mitigation Plan

Doc Attached: Y

Explanation: mitigate by transfer of New Union Ditch Co. shares under 63-146

2. slester 7/13/2005 11:38:48 AM Additional Information Supporting Application

Comment:

Mitigation Plan or acceptance form: Attached

3. slester 7/13/2005 Comment/Analysis

Comment: Water from a shallow ground water pond tributary to the Boise River will be used for a pond amenity plus irrigation of common areas in Ulmer Lane Townhomes development. Application held pending expiration of SRBA objection period for Ada County. This is because the mitigation plan is a transfer application of right 63-146. The transfer cannot be processed until the objection period is over per 7/8/05 guidelines from IDWR Administration. That transfer application also proposes mitigation for protested application 63-31934 for adjacent Lakeland Village development.

4. dnelson 6/6/2007 Comment/Analysis

Comment: This application for permit proposes 14.25 afa for a one-time fill of a pond and 4 acres of irrigation in association with Ulmer Lane Townhomes. The evaporation losses will be accounted for through the ground water recharge proposed in transfer number (need the transfer number here) for New Union Ditch Company LTD, and are not addressed through this application. The evaporation losses covered under the transfer will be approximately 0.01 cfs and 2.2 afa for the pond. The same transfer will also mitigate the irrigation use from ground water. This use will be account for 0.08 cfs and 18 afa under this transfer. This application will need conditions that include this information, and could be taken from the transfer and modified to fit the application for permit process. During low water years, the New Union Ditch Company LTD may not deliver a full volume of water to each water user. Therefore, a condition needs to be added that states something similar to the following: The volume of water diverted under the irrigation portion of this right shall not exceed the volume of water available for delivery by the New Union Ditch Company LTD for 4 acres of irrigation under their delivery system.

5. scurtis 6/6/2007 Legal Notice Remarks

Comment: Mitigation is proposed for consumptive use; Transfer #73632 was filed to mitigate evaporation losses from pond and the 4 acres of irrigation.

Dates and Other Information:

Application Received Date: 4/7/2005

Protest Deadline Date: 9/4/2007

Number of Protests: 0

State or Federal:

Owner Name Connector:

Water District Number:

Generic Max Rate Per Acre:

Generic Max Volume Per Acre:

Application Type: New Appropriation

Applicant Remarks: Mitigation for (1) evaporative losses from the new pond and (2) irrigation withdrawals from the new pond will be accomplished by diverting water currently used for irrigation on property under water right 63-146 to an adjacent pond for ground water recharge (see accompanying transfer under water right 63-146). Total amount of annual mitigation consists of 0.09 cfs (4 acres of irrigation at 0.02 cfs/acre and 0.6 acres of evaporative losses at 0.02 cfs/acre). Applicant will not divert storage water for mitigation that is limited to irrigation uses under current New Union Ditch Company storage contracts.

Other Water Rights: New Union Ditch Company shares 63-146 etc. for irrigation
