Subject: ITD water right application and ZMAK water right application #85-15709

Keith –

As we discussed on the phone the other day, IDFG will not pursue our objections to ITD's application to withdraw water from Apgar Creek for fire protection and irrigation.

Also, we have reviewed the application by Ted and Linda Zmak (#85-15709) to withdraw 0.2 cfs from a 900' deep well for irrigation from 2/15 to 11/30 annually. The well is located within the city of Lewiston and we do not anticipate that the proposed withdrawal will have significant impacts on fish or wildlife.

Please let me know if you have any questions or require more information.

Thanks.
