RE: Petition for Change of Condition- Water Right Permit No. 71-7179

Attn: Daniel A. Nelson
Staff Hydrologist

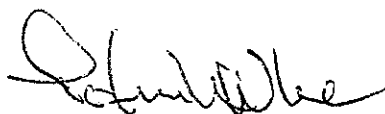

This letter is our request that the condition on the referenced permit that requires installation of a measurement device within a data logger on our well be amended. Instead of using a data logger because of the small amount of water being diverted and the dedicated meter at the well, we would request the use of the PCC (power consumption coefficient) method of monitoring suggested by Mr. Nick Miller in conversations with both you and us.

We have enclosed the Application for Amendment, the \$50 filing fee, and pictures of the installation of a weir in the south channel of Lost Creek, located between the fence and the point where water is discharged from the well (your instructions, 10/24/08 letter). This weir was removed from the North Channel and be located to the South Channel of Lost Creek.

Thank you for your aid in helping us achieve compliance with the permits.

John T. Brown
