Re: Permit Review

This application is for multiple different uses in an area subject to the Wild and Scenic conditions and spreadsheet. To address the overlapping surface water rights for 66 acres, applicable conditions have been applied.

The 29 acre feet the applicant applied for takes into account seepage and evaporation. The actual capacity of the pond is ~6 acre feet.

The application does not have any objections and is consistent with department rules, therefore it should be approvable as recommended by IDWR Southern Region.
