Re: Evaluation Memorandum

The purpose of this transfer is to remove 96 acres of irrigation from corners as well as removing end guns. The purpose of this change is to save energy by removing endguns thereby reducing PSI, and reduce man hours needed for moving hand lines on corners.

This transfer will move 96 acres; $5.6 \text{ cfs} / 343 \text{ ac} = 0.0163 \text{ cfs per ac}$; $0.0163 \text{ cfs per ac} * 96 \text{ ac} = 1.56 \text{ cfs}$; 1.56 cfs is \$290 transfer fee.

Authority to File:

The applicant submitted warrantee deed as proof of ownership.

Water Right Validity:

Ground under existing pivots appears irrigated in 2006 NAIP. I conducted a site visit this September, and during this visit the applicant showed me the corners were irrigated this summer.

Injury to Other Water Rights:

The transferred water rights are contained within water district 120. Watermaster will comment.

Transfer will not be advertised, the change does not result in a hydrologic difference, after the transfer the same diversion rate from the same wells for the same number of acres.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
