Re: Application for Permit No. 63-32827

Dear Mr. Marshall:

Your client's application for permit to appropriate public ground water was received on July 31, 2007. Processing of the application must be delayed as explained in this letter.

Due to continued drought and to protect existing water rights and water supplies, the Idaho Department of Water Resources (IDWR) declared a moratorium in 1992 against approval of new consumptive uses of public water for the area in question. The moratorium was lifted in 1995. However, application processing was suspended in 1996 pending policy determinations being considered by IDWR at that time. The current policy does not allow processing of the application at this time unless the consumptive use associated with the proposed development is mitigated.

This office will hold the application and will resume processing as soon as possible based on the above considerations. Processing generally follows the priority system in which older applications are addressed before newer ones are processed. Delays related to department actions do not affect the date of priority or seniority of an application. You will be informed of any changes with respect to your client's application.

Please contact me at 334-2190 if you have any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read "Steve Lester". The signature is fluid and cursive, with the first name "Steve" and last name "Lester" clearly distinguishable.
