Re: Application for Permit No. 63-32569

Dear Applicant:

Your application for permit to appropriate public water for a consumptive use was received on November 14, 2006. Processing of the application must be delayed as explained in this letter.

Due to continued drought and to protect existing water rights and water supplies, the Idaho Department of Water Resources (IDWR) declared a moratorium in 1992 against approval of new consumptive uses of public water for the area in question. The moratorium was lifted in 1995. However, application processing was indefinitely suspended in 1996 pending policy determinations being considered by IDWR. At this time, IDWR cannot estimate when or if policy changes will allow application processing to resume.

Several options might be worth exploring as follows.

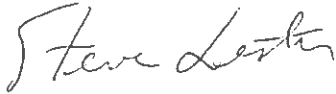

1. Transfer an existing valid ground water right from other property to your land. This would involve a private agreement between the buyer and seller plus an Application for Transfer of Water Right to be filed with and approved by IDWR.
2. Mitigate your proposed use by obtaining a valid ground water right from another owner and then abandoning that water right to mitigate your proposed use. This would include filing a Notice of Change in Water Right Ownership with IDWR together with written abandonment of that right.
3. Mitigate your proposed use with another type of mitigation plan approved by IDWR.

This office will hold your application and will resume processing as soon as possible based on the above considerations. Processing generally follows the priority system in which older applications are addressed before newer ones are processed. Delays related to department actions do not affect the date of priority or seniority of an application. You will be informed of any changes with respect to your application.
