Re: Idaho Department of Corrections Permit 63-12296

Dear Mr. Westra:

This letter is in regard to the Idaho Department of Correction's (IDOC) Application to Amend Permit 63-12296, which seeks to add a new well as a point of diversion.

United Water Idaho Inc. (United Water) had previously informed your office that it was not opposed to approval of the Application provided that a condition be added to the Amended Permit specifying that the original point of diversion (known as Well #3) and the proposed new point of diversion (referred to as Well #3-B) will not produce water simultaneously. We have been informed by IDOC's consultant, Edward Squires that this was to be condition No. 17 on the Amended Permit.

IDOC has since requested that United Water allow the condition to be changed to allow Wells #3 and #3-B to pump simultaneously, if necessary, in order to obtain the 5 cfs allowed under the Permit. United Water does not object to changing condition No. 17 to the effect that "Diversion of water from two points of diversion (Wells #3 and #3-B) located in the SW SW, Section 27, T2N, R2E shall not exceed 5cfs at any given time."

Sincerely,

Gregory P. Wyatt,  
Vice President and General Manager  
United Water Idaho Inc.
