Re: Proposed Water Right Transfer Application by Idaho Department of
Corrections to Add a New Point of Diversion (Well #3-B)

Dear Mr. Lester:

Mr. Ed Squires, representing the Idaho Department of Corrections (IDOC), contacted United Water Idaho concerning a proposed water right application to add a new production well (Well #3-B) at the Idaho State Correctional Institution (ISCI). The proposed well would be located at the same site as ISCI's existing Well #3-A. Mr. Squires has discussed the project with our company hydrogeologist, Roger Dittus, and verified IDOC's need for a reliable back-up supply well against the possibility of a failure of Well #3-A (ISCI's lead supply well), which is over 40 years old.

United Water Idaho does not oppose the proposed water right transfer by IDOC to add a point of diversion (well) at the ISCI Well #3 site with the single condition that only one of the wells, either Well #3-A or Well #3-B, can be in production at any given time. In other words, if the Idaho Department of Water Resources can add a condition to the approved water right that prohibits pumping from both wells at the same time, then United Water Idaho will not oppose IDOC's proposal to add the new Well #3-B. If you have any questions, please let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "Gregory P. Wyatt", written over a horizontal line.

Gregory P. Wyatt
