RE: Application for Permit 57-11713, Snake River RV Resort

Dear Ms. Music,

In response to your letter dated October 16, 2008, I can offer the following information.

The subject application lists 0.53 cfs for domestic and 0.53 cfs commercial for a total of 0.53 cfs. This is to accommodate the in-home water needs for 100 mobile homes and 45 RV spaces. The assumptions behind these numbers are that the 100 mobile homes will be the resident's primary homes and hence the domestic use. The RV spaces are for vacationers and travelers who rent a space on a per night basis, hence the commercial use. I have calculated the total water demand to be 0.53 cfs, but cannot distinguish one use from the other as it will be one system. Included in the demand is the office for the resort, which doubles as the manager's home.

All outside irrigation is authorized by water right number 02-2318B, so no irrigation demand was factored into the subject application.

Enclosed, please find the well upgrade fee of \$190. If you have any further questions, please let me know.

Regards,

Steven R. Hannula

Re: Application for Permit 57-11713, Snake River RV Resort

Dear Steve:

On December 20, 2007, you submitted the above application on behalf of your clients, Diane B. and Charles J Kritz, Jr, and Raymond C., Barker. The application has been assigned to me for review and processing. There are a couple of minor items that must be addressed before processing can continue.

The application states the uses are domestic and commercial for 100 mobile homes and 45 RV spaces. What is the difference in the uses or are the uses identical. Is landscape irrigation included? Office? If the uses are the same, the application should be amended by the applicant to commercial use.

The water right application proposes ground water use from a well. All wells drilled in Idaho after June 30, 1987, require well drilling permits. According to the records of Idaho Department of Water Resources (IDWR), the existing well was drilled in 1990 under a \$10 domestic well drilling permit. The \$10 drilling permit covers a well that does not require water right approval from IDWR. This is typically a single-family domestic well.

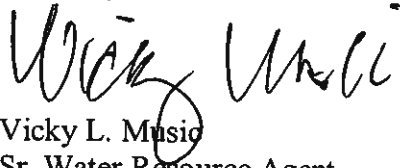

Proposed use from the existing well does require water right approval, and your water right application seeks that approval. The well drilling fee for a well requiring a water right is \$200 instead of \$10. IDWR must collect the unpaid balance of \$190 for a well drilled under those circumstances.

57-11713

Please remit \$190 to upgrade the existing well drilling permit. I will continue to process the application in the interim, however, final approval of your application will be delayed if you upgrade fee is not received.

Additionally, please submit the requested information re the uses by November 17, 2008. Please contact me at 208-334-2190 if you need more information and thank you for your attention to this matter.

Sincerely,

RE: Snake River RV Resort Application for Permit

Dear Mr. Lester,

Enclosed, please find an Application for Permit in the name of Diane B. Kritz, Charles J. Kritz Jr, and Raymond C. Barker, who are the owners of the Snake River RV Resort in Owyhee County. The application seeks domestic and commercial water as a supply for an existing and expanding mobile home park and RV resort. Also, a new well will be needed to provide backup.

The require \$250 filing fee is included.

Please call if you have any questions.

Regards,
