Attachments: RE Water Right Question.htm

Keith,
I understand from our phone conversation that there are a few items that need clarification for the water rights transfer application.

1. The new well is expected to be drilled and supplying water to the water system within a year.
2. The point of diversion (POD) for water rights 95-7056 and 95-7057: I emailed Matthew Weaver with the Idaho Department of Water Resources, on May 14, 2008 regarding the POD for these water rights. I could not find any documentation for the wells. Mr. Weaver's response is attached to this email. It appears the listed POD for each water right never existed. Mr. Weaver also researched some field notes and found that the POD for these water rights were combined but the field notes do not say how they were combined.

Please let me know if there is any more information I can provide.
