tony says generally the priority date is cut in april.

joe says the last recorded use was into 1987

I am drafting an approval for this Permit after considerable discussion regarding mitigation etc. It is located within WD #120 & any comment regarding special conditions would be appreciated. Also, a question regarding the historical delivery of the proposed mitigation rights was raised. These 3 rights are from Blue Creek, tributary to Henry's Fork. Would WD 01 have records of delivery for SRBA Decreed Rights 21-2012, 21-2034 & 21-7148?

We are trying to prepare this today, so your quick response would be appreciated!

Thanks,
Pam
