Letter of Official Protest in the Water Right application for Andrew Walker on Riser Creek in Hope, Idaho.

I live on the farm the Water Right #96-2144 serves. I take care of all the irrigation on the farm. This is a productive operative farm and depends on the water from Riser Creek to irrigate the crops the farm produces. During the summer months when conditions are dry there is not enough water to serve the existing water rights on Riser Creek. The Creek will go under ground as the water flow drop during the summer. The same will hold true during the winter months when conditions are cold and dry.

Respectively submitted,

Dale Van Stone
