

MEMORANDUM

Date: August 8, 2008
To: Water Right File 21-7348
From: Aaron Marshall
Re: Licensing Review

Permit no. 21-7348 authorized the use of water for domestic, recreation storage, and irrigation purposes at Rock Creek LDS Girls Camp. The field examiner indicated that domestic use is for the dining hall, kitchen, shower house, and one cabin, recreation storage is for a pool, and irrigation is for 2.6 acres.

The domestic use should be licensed as recommended by the examiner although the season of use should reflect the current Department standard: 0.04 cfs, 0.6 acre-feet, from 01/01 to 12/31.

The recreation storage use should be licensed as recommended by the examiner although the season of use should be year-round since the actual season of use is unknown and the volume limitation will remain the same: 0.1 acre-feet, from 01/01 to 12/31.

The irrigation use should be licensed as recommended by the examiner although the season of use should reflect the current Department standard: 0.08 cfs, 9.1 acre-feet, for 2.6 acres, from 04/15 to 10/31.

A diversion to storage component should be identified on the license equivalent to the combined rate of the domestic and irrigation uses, 0.12 cfs.

In sum, the license should limit the rate to 0.12 cfs and the annual volume to 9.8 acre-feet.
