

MEMORANDUM

Date: October 09, 2008
To: Water Right File 47-8438
From: nvandyke
Re: S.O Review

Application filed to provide for rate lost by inoperable wells and increased demand. Well location was originally in the swnwse Sec7 T10S R16E. Amendment of permit was filed and approved to move well to current location in the swne Sec8 T10S R16E. Place of use is the City of Filer service area.

In total 5 wells are used to provide water to the municipal system. Well drilled under this right is referred to as #7. Measured flow capacity of #7 was measured at 4.59cfs by field examiner. Licensed rate limited to permitted amount of 0.67cfs. Right 47-16843 is for additional capacity of the overall system. Field examination of this right and 47-16843 were done at the same time. Refer to field report narrative for additional information on measurements.
