9/27/2007 Jim, Pam and Allen reviewed the rights associated with the above rights and considered how the earlier East Valley Cattle transfer was conditioned.																		
After consideration and review by Jim of the original overlays it is recommended that the above conditions in blue be applied to the rights prior to splitting the rights for the proposed transfer to make sense of the limitations as decreed and split by previous transfers.																		
As shown there are corrections of a few overall limits to correct what was a data entry error on the total cfs rate. As before the applicant must agree in writing for this analysis.																		
The purpose of the transfer is to dry up acres to convert to feedlot
