Re: Portion of Application for Permit No. 63-12418

Dear Applicants:

As noted in my telephone conversation with Greg, your assignment for a portion of the above referenced application was misplaced but has been found and will be activated right away. Based on the Idaho Department of Water Resources (IDWR) records, you have a domestic well that I assume you want to use for your portion of the application.

This means that your portion of the application also includes an amendment to use your well instead of the original well proposed by Mr. Garber. Based on that assumption, the enclosed application was drafted for your completion and approval. The draft outlines your well for the split portion of use identified in the assignment: irrigation of 5 acres, domestic for 1 home, plus some stockwater.

The following information needs to be completed on the application.

Item 3, point of diversion – see the map attached to the application. Your parcel falls within two $\frac{1}{4}$ $\frac{1}{4}$ portions of the section, NESW and NWSW. Mark the well location on the map. Enter the correct $\frac{1}{4}$ $\frac{1}{4}$ in item 3 of the application.

Item 7, time required – list the number of years needed to complete your proposed development. You can list 1, 2, 3, 4 or 5 years to put the water to the full beneficial use listed in the application.

Item 8b, stockwater – list the type and maximum number of animals you will have, such as 10 range cattle and horses.

Item 10, other rights – is the land currently served by other irrigation water, such as from a ditch company? Is other water available for domestic and/or stockwater uses? Do you plan to irrigate your yard as part of the 5 acres of irrigation (versus in addition to the 5 acres)?

Toolson = 63.33118

Portion of Application for Permit No. 63-12418
October 2, 2008
Page 2

Item 13, signature – only 1 signature is needed for your names joined by “&/or” as listed in item 1 of the application.

The application fee was already paid by Mr. Garber in 1997. However, use of your well for the proposed water right means the \$75 well drilling fee originally paid for your domestic well must be upgraded to a \$200 drilling fee associated with a well used for irrigation (well construction rules and Idaho law). Please remit the \$125 well drilling upgrade fee with your completed application.

Your application will be processed as soon as it is completed and returned. Processing includes legal notices prepared by IDWR and published in your local newspaper. Assuming a protest is not filed against your application (most applications are not protested), your application can be approved fairly soon.

More IDWR information is available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you have any questions. Last but not least, I apologize for the error in misplacing your assignment for a portion of this application.

Sincerely,

Assignment & split

Mr. Tulsom called & spoke to several people at Western. Had filed Assignment for portion of Appl. in March 2008 and wondered about current status.

The Assignment was accidentally misplaced - my fault - but can now be activated.

I will send Tulsom the necessary info. Upon his response, we can:

1) split 63-12418

2) process Tulsom portion

3) void Garber removing ~~part~~ portion

(9/8/08 order will apply to Garber portion but not to Tulsom portion)
