Re: Application for the City of Rigby

Dear Reviewing Agents,

The City of Rigby is seeking to include the three existing wells as points of diversion for water rights 25-4009, 25-4010, 25-4011, 25-7523, 25-10496. In addition, they seek to add a new well as a point of diversion, which will be located in a newly annexed area of the city, for each of these rights. No additional rate or volume is sought through this transfer.

Upon reviewing the water rights, it appears that existing well #1 is incorrectly placed in the shapefile found on the IDWR database. It is currently shown to be located as a centroid in the NESW of Section 18, T4N R39E. The legal descriptions on the water rights are correct; the well is located in the SESW of Section 18, T4N R39E. Notice on the maps attached that the well location has been pinpointed more accurately based on information from the City of Rigby.

Also note that the location of the proposed new well as indicated on the maps attached is approximate.

If there are any questions regarding this transfer, please address them to Rocky Mountain Environmental Associates, Inc.

Sincerely,

A handwritten signature in blue ink that reads "Kristin Moore".
