A. Purpose of Transfer

1. ☐ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
☒ Change nature of use ☐ Change period of use ☐ Other _____

2. Describe the reason for the proposed changes

Areas within the presently recorded places of use for these water rights are being developed for roads, parking lots and buildings. The purpose of this application is to change the location authorized for irrigation and stock watering from areas that are or will be covered by such development features to equivalent areas not within the presently recorded place of use for these rights. A permissible place of use is proposed for the rights included in this application. An additional purpose for this application is to change the nature of use of the portions of the water rights now recorded as irrigation to mitigation for evaporation from a pond enlarged within the place of use of these rights.

6. General Information:

- a. Description of diversion system **Head gates and ditches are used to divert and distribute water for the rights diverting from Garden Creek. A well, ditches, pipelines and sprinklers are used to divert and distribute water under Right No. 72-4174C and 72-4174D. Changes are not proposed to the diversion systems as a result of the approval of this application.**
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes X No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer: **Irrigation of some of the area (5.0 acres) within the presently recorded place of use will be permanently discontinued as a result of approval of this transfer. An area of 4.8 acres will be added to the place of use for irrigation within the SWNW Section 2, T13N R18E. There will be no increase in the total number of acres irrigated under the combined rights nor any increase in the number of acres irrigated under the individual rights. The amount of mitigation authorized by these rights will be increased by removing irrigation as an authorized use for 0.2 acres in the NENW Section 2, T13N R18E to mitigate evaporation from a pond located on those 0.2 acres (See the attached mitigation plan prepared for Permit No. 72-16625).**
- d. Remarks: **The permissible place of use is requested because of the existing overlap in place of use of the rights and to avoid the need to file multiple applications for transfer to**

record the minor change in use requested. Because the points of diversion and distribution systems will not be changed, water diverted under rights No. 72-4174C and 72-4174D will not be used south of Garden Creek and the effect of the change will be to reduce use under the other rights north of Garden Creek in proportion to the use added south of Garden Creek.
