**DEPARTMENT OF
WATER RESOURCES**

RE: Request to Amend Water Right License No. 22-7397, and Response to Letter
Dated June 24, 2008.

Dear Mr. Keen:

This letter is being provided in response to your letter dated June 24, 2008, where you set forth your analysis and decision as to our request to amend License No. 22-7397, from 1.97 cfs to 3.16 cfs. Towards the end of the letter, you stated that without more information IDWR does not conclude that the license diversion rate of 1.97 cfs was in error. We appreciate your attention to this matter, and your letter caused us to examine a number of historical documents maintained by the license owner, Mr. Layne Harris. In the course of reviewing the assertions made in your letter, we discovered some additional documents, and in discussing this history of this matter further with Mr. Harris, we believe provide sufficient evidence that the licensed amount of 1.97 cfs was in error. Enclosed with this letter is the Affidavit of Layne Harris, with a number of attached documents labeled A through H. We request that you review these documents, Mr. Harris' affidavit, and this letter and we again request that the license be amended to 3.16 cfs.

Based upon the information provided in Mr. Harris' affidavit, we wish to again review the history of this water right and how it was developed. Mr. Harris submitted an Application for Water Right Permit on April 30, 1982. The permit requested the right to divert 3.2 cfs of groundwater for the irrigation of 160 acres. The amount was chosen by Mr. Harris after he visited with Department staff, and you will note that the 3.2 cfs comports with the Department's long standing rule of thumb that 0.02 cfs per acre of groundwater is commonly allocated. At 160 acres, and applying this rule of thumb, Mr. Harris correctly applied for the 3.2 cfs.

On July 21, 1983, Mr. Harris submitted proof of beneficial use to the Department. See Exhibit B to the Harris Affidavit. It is crucial to note that the extent of use submitted totaled 160 acres, the same 160 acres for which Mr. Harris had applied for. Between the time proof was submitted, and the time the field examination was actually performed in 1987, over four years had

passed. During that time, Mr. Harris began leasing an additional 100 acres referred to by Mr. Harris as the "Church Farm". The details of the purchase of this property are set forth in Mr. Harris' affidavit.

Importantly, Mr. Harris did not begin irrigating this property until 1986 (three years after he submitted proof of beneficial use for 22-7397), and when he did so, it was under the understanding that there were other existing water rights appurtenant to the property. The existence of these additional water rights was noted in the licensing report by Keith Wilson in his overlap analysis. See Exhibit C to the Harris Affidavit. Additionally, the field report shows that Mr. Harris developed the 158 acres in the NE¼, T6N., R41E., Section 10. In your letter, you assert that the beneficial use field report for Permit No. 22-7397 indicates that the permit holder used nine 32-Bird Hand lines and that he irrigated 258 acres. This is not accurate. Nowhere in the field exam report from Mr. Foletti, nor the overlap analysis by Mr. Wilson, is there an indication that the additional 100 acres were to be included within this water right. Nor did either Mr. Foletti or Mr. Wilson recommend that the diversion rate be reduced. The decision to reduce the diversion rate appears to have been made by Tim Luke.

Importantly, the map attached to Mr. Wilson's overlap analysis depicts the 100 acres and says "PD (point of diversion) of 22-7397 also irrigates this area under other water rights." (Emphasis added). Thus, we acknowledge that these acres were irrigated out of the same point of diversion as Water Right No. 2207397, but they were irrigated based on Mr. Harris' understanding that there were already appurtenant water rights on that property. Mr. Harris did not understand that technically, his point of diversion was not authorized in 1986 to irrigate these 100 acres. He believed it was not inappropriate to use his well because the authorized point of diversion (the Waltz well) was only approximately ½ mile away.

Nevertheless, despite the use of his well, the fact remains that there were additional water rights appurtenant to the 100 acres, and Mr. Harris eventually, once he purchased the property in 1988, undertook administrative measures to split off the proportionate amount of water rights appurtenant to the 100 acres, and to authorize the point of diversion for Water Right No. 22-7397 to irrigate these 100 acres. As you can see from the Harris affidavit, we have provided a copy of an Application for Transfer prepared by Mr. Harris and Mr. Ron Carlson, formerly of the Eastern Region office of IDWR. We believe that this transfer was eventually rendered moot when Val Schwendiman, the original owner of the water rights which were to be split off to Mr. Harris eventually acquired the property from Mr. Harris 1990. The water right split and transfer were no longer necessary.

As to the number of handlines used by Mr. Harris, in your June 24th letter, you assert that a long standing rule of thumb for an irrigator is that three lines are needed for 80 acres. Mr. Harris' rule of thumb, which is commonly employed with other farmers in his area, is that 4 quarter mile lines are needed per every 80 acres. Mr. Harris developed 9 lines, with the additional line being added for convenience. Additionally, we again note in the field exam that the nine lines were placed on the 158 acres as noted by Mr. Filetti. It seems you have assumed that the nine lines were applied on both the 158 acres, and the additional 100 acres on the "Church Farm". This is not documented anywhere in the field exam.

Additionally, Mr. Harris notes that it was necessary to apply for the amount that he did pursuant to his plans to eventually install a center pivot on the property. The 3.2 cfs comports with the 1,300 gallons per minute minimum which is required for a pivot the size Mr. Harris intended to install. The pivot was actually installed in 1989.

In your letter, you state that if we assume all nine lines and all of the 3.21 cfs were applied to the 158 acre permitted place of use, no capacity would be left to simultaneously irrigate the additional 100 acres, which we know is being irrigated with water diverted from the same well. We note, however, that this sentence is somewhat incomplete. It is true that this well did irrigate the 158 acres, and the 100 acres, but that the irrigation was done on a rotation basis. In other words, at no point were all 258 acres irrigated at the same time. When the 100 "Church Farm" was being irrigated, a portion of the 158 acre place of use was also being irrigated.

I must admit that we are not entirely clear as to why the number of handlines in this instance appears to be crucial to the issue of how the water rights should be licensed. As we have asserted, and was noted by IDWR in the field exam, the "Church Farm" was authorized for irrigation under other water rights. As such, from a water rights perspective, all of the properties were covered by water rights. Further, nothing in the field exam records development of 22-7397 different than Mr. Harris applied for. We can only conclude that the reduction in diversion rate was an error.

In the memo to file prepared by Tim Luke, dated January 21, 1990, which is in the Department's file, Mr. Luke correctly notes that the total system irrigated 258 acres. It appears that Mr. Luke did not take into consideration the notation made by the field examiner, Mr. Filetti, and Mr. Keith Wilson, that the 100 acres were irrigated under other water rights. As stated by Mr. Harris, he did not formally change the point of diversion to irrigate that property in 1986 as he was only lessor of the property, but eventually did undertake administrative action to do so shortly after he purchased the property in 1988.

Shelley W. Keen
Idaho Department of Water Resources
July 3, 2008
Page 4 of 4

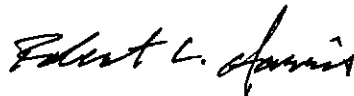

We believe the enclosed information provides adequate evidence and information supporting our request to have the license amended. At its core, it appears that perhaps the two major causes of the error were (1) the over four year delay in performing the licensing examination, as irrigation of the "Church Farm" did not begin until 1986, which is three years after Mr. Harris submitted proof of the 160 acres for which 22-7397 was to irrigate; and (2) the confusion created by the overlapping water rights on the "Church Farm", as it appears Mr. Luke did not take this into consideration based on his memorandum.

In short, we believe we have provided sufficient evidence to support our request to amend Mr. Harris's license. It would have been preferable for the error to have been caught years ago, but as Mr. Harris states in his affidavit, he received no Department document requesting an amendment to the permit, nor did he receive any notice that the diversion rate would be anything different that Department staff represented to him, and consequently, he viewed the issued license as a mere formality and did not examine it as closely as he should have.

We appreciate your assistance in this matter, and your prompt response of June 24, 2008. As you are aware, we have objected to the recommendation for this water right in the Snake River Basin Adjudication, and an initial hearing on this water right is preliminarily set for the middle of August. It is our desire that this matter be resolved before that hearing. We note lastly that we are not seeking the addition of any additional volume, because the license included three and a half acre feet for each of the 158 acres. It therefore appears no other water user will be injured. We are only seeking to increase the diversion rate to historically reflect how the water right has been used, and how Mr. Filletti measured and documented the diversion system in 1987.

If you have any questions regarding the enclosed information, please let us know. We look forward to hearing from you.

Best Regards,

Robert L. Harris

In Re Request to Amend Water Right License
No. 22-7397

**AFFIDAVIT OF
ROBERT LAYNE HARRIS**

STATE OF IDAHO)
) ss.
County of Bonneville)

I, Robert Layne Harris, do solemnly swear (or affirm) that the testimony given in this sworn statement is the truth, the whole truth, and nothing but the truth, that it is made on my personal knowledge, and that I would so testify in open court if called upon to do so.

And being so sworn I depose and say:

1. I am over the age of eighteen (18) years old and competent to testify as the matters contained herein.
2. I am the owner of Water Right No. 22-7397, and requested Kent Foster and Robert L. Harris of Holden, Kidwell, Hahn & Crapo, PLLC to petition the Idaho Department of Water Resources ("IDWR") to amend the license issued for Water Right No. 22-7397. I have reviewed IDWR's response to that request in a letter dated June 24, 2008, and wish to provide factual information setting forth my understanding of how 22-7397 was developed, and my intend of how it was to be licensed. Specifically, the June 24, 2008 letter states the following: "Without more information about the distribution system employed during the development period for the permit, IDWR does not conclude that the licensed diversion rate of 1.97 cfs was an error." This affidavit will set forth all of the information I recollect

regarding this water right, ownership of property, and information relative to the distribution system.

3. On April 30, 1982, I submitted an application for permit for a water right to develop a ground water right to irrigate 160 acres. See Exhibit A. The location of the 160 acres was entirely within the NE1/4 of Section 10, Township 6N, Range 41E. The application for permit was assigned the number of 22-7397 by IDWR.
4. In filling out the application, I requested the right to divert 3.2 cubic feet per second ("cfs"). To the best of my recollection, I applied for the 3.2 cfs after visiting with an IDWR official, who I believe was Ron Carlson, but I cannot say for certain that he was the person I visited with. My understanding is that IDWR's rule of thumb for ground water diversion is .02 cfs/acre, and since I proposed to irrigate 160 acres, .02 cfs/acre multiplied by 160 acres equals 3.2 cfs.
5. In addition, I planned on installing a main pump and a booster pump in order to utilize nine quarter-mile hand lines for irrigation. I have reviewed the letter from IDWR dated June 24, 2008, and wish to respond to the claim made that a longstanding rule of thumb is that one would need three lines per 80 acres. My experience is that the rule of thumb for the number of lines to place is four quarter mile handlines to each 80 acres are needed to irrigate at a minimum. I developed nine quarter mile handlines for convenience in order to get across the property faster. In order to provide sufficient pressure for these nine handlines, I designed a system that consisted of a main pump and a booster pump. In addition, this system was designed because I planned on eventually installing a center pivot to irrigate the 160 acres, and based upon my conversations with Golden West Irrigation at the time, I would need a

pump that could produce 1300 gallons per minute at a minimum. The 3.2 cfs amount I applied for was just over this diversion rate.

6. In 1989, I installed the center pivot.
7. I submitted proof of beneficial use for 22-7397 on July 21, 1983, approximately 20 days late. As a result, the priority date of the water right was advanced 20 days. A copy of the proof of beneficial use I submitted is attached at Exhibit B. The proof is dated July 21, 1983, and it was received by IDWR on July 27, 1983. I believe it is crucial to note the extent of development for which I submitted proof: 160 acres, the same 160 acres for which the application was submitted in the NE1/4 of Section 10, Township 6N, Range 41E.
8. The next time I heard from IDWR was over five years after I submitted proof of beneficial use for the 160 acres. I was contacted by Mr. Samuel Filletti to conduct a field examination, and visited with him after he conducted his examination. I specifically asked if everything checked out, and he said that the measurements he performed were nearly exact to the diversion amount we requested. I have since reviewed the licensing examination report he prepared, which is attached at Exhibit C, and see that Mr. Filletti recommended that the water right be licensed at 3.16 cfs, and 553 afa. The field exam was conducted during the irrigation season, and upon review of the field exam report and overlap analysis, see that it was conducted on August 17, 1987, and certified on December 2, 1987. As stated above, I applied for 3.2 cfs, and was pleased to know that the field examination comported so well with the application. The acres noted in the field examination totaled 158 acres, two acres short of the 160 for which I had applied for. However, Mr. Filletti correctly excluded these two acres as we had constructed a potato cellar in the SE1/4NE1/4, which removed the two acres.

9. Based on this conversation with Mr. Filletti, I filed a claim in the Snake River Basin Adjudication for a water right with a diversion rate of 3.2 cfs for the irrigation of 160 acres. The claim was filed on September 14, 1988. A copy is attached at Exhibit D.
10. The next item which I received from IDWR was in March of 1990, when I received a letter with the signed license. The signed license reduced the diversion rate from the original 3.2 cfs I had applied for, to 1.97 cfs. When I received it, I simply failed to pay attention to the reduced diversion rate, as I had relied upon Mr. Filetti's representation that the water right was developed as I had applied for and the receipt of the license was a mere formality. It was not until December 2006 when I asked my attorney Robert Harris to review the water right recommendation for 22-7397, and he brought it to my attention.
11. At no time did I receive a letter or other communication informing me that the license would be any different than Mr. Filetti had represented to me. Further, I did not submit an application for amendment of permit, or an application for amendment of permit for licensing purposes. The change to the diversion rate was done without my knowledge. I believe the reduced diversion rate was an error, and based upon a misunderstanding of the irrigation system I had developed. I have also reviewed the memorandum from Kristin Moore and Harold Jones dated December 29, 2005, and concur with its analysis and conclusion.
12. Based on my review of the water right documents provided to me by my attorney, it appears that confusion was caused by my placement and use of an irrigation mainline for the authorized point of diversion for 22-7397 to 100 acres located in Section 11, Township 6N, Range 41E. I believe a background as to the history of ownership of these 100 acres, as well

as the 158 acres to which 22-7367 is appurtenant, will clarify what was intended to be accomplished.

13. Before I purchased the 158 acres, it was owned by the Packer Corporation, and was authorized to be irrigated under License No. G-29086. A copy of this license is attached at Exhibit F. When I purchased the property, one of the terms of the purchase was that I would develop my own well to irrigate the 158 acres. This is why I filed an application for Water Right No. 22-7397.
14. About ten years after I purchased the 158 acres, an opportunity arose to purchase an additional 100 acres, which I often referred to as the "Church Farm" because it was previously owned by the LDS Church. I leased the property beginning in 1986, and understood that it already had appurtenant water rights owned by Val Schwendiman, who filed a transfer application that was approved in 1983 (Transfer No. 2728). The LDS Church stopped leasing the property to Mr. Schwendiman, and began leasing it to me. Due to my incomplete understanding of Idaho water law, I did not realize that I could not technically irrigate the 100 acres from my well under the Church Farm's existing water rights, but my well was only approximately one-half mile from the authorized well. I did not want to make any formal changes to the water rights because I was only leasing the property in 1986.
15. In 1988, the LDS Church decided to sell the Church farm, and in a sealed bid, I was selected to purchase the property. Attached at Exhibit G is a copy of the recorded deed evidencing the purchase.
16. Shortly after I purchased the property, I visited with Ron Carlson of the Eastern Region Office of IDWR in an attempt to make sure the water right was documented correctly, and he helped me prepare an application for transfer to change the point of diversion for the

portion of the water rights conveyed to me with the purchase of the Church Farm. A copy of the transfer and its associated map is attached at Exhibit H. The transfer involved splitting of water rights, which I did not have sufficient knowledge of. Mr. Carlson's help was necessary to make the necessary changes. The transfer application is not signed or dated, and I believe this was a copy that I took home, but a signed version was submitted.

17. Ultimately, I believe the transfer was rendered moot because I sold the Church Farm in 1990 to Val Schwendiman, whose rights were to be split to me in the transfer. My father died on September 5, 1986, and due to financial difficulties from his death, it was necessary to sell the 100 acres.
18. I never intended to change my original application to irrigate the 158 acres, and it appears to me that the reduction in diversion rate was an error. It is my desire that the license be amended as it was originally recommended by Mr. Filetti at 3.16 cfs.

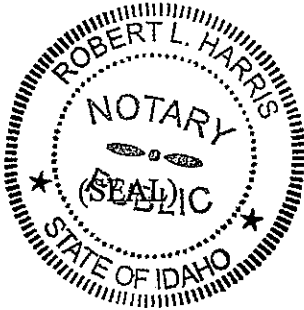

DATED this ~~2~~ 3 day of July, 2008.

Robert Layne Harris

STATE OF IDAHO)
)ss.
County of Bonneville)

On this 3rd day of July, 2008, before me, the undersigned, a notary public, in and for said State, personally appeared ROBERT LAYNE HARRIS, known or identified to me to be the persons whose name is subscribed to the within instrument and acknowledged to me that they executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, the day and year in this certificate first above written.

Robert L. Harris

APPROVED

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant Layne Harris Phone 458-4936

Post office address Newdale, ID. 83436

2. Source of water supply (GROUNDWATER) 6-15-82 EMC
Well which is a tributary of _____

3. Location of point of diversion is SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 10 Township 6N.

Range 41 E. B.M. Madison County, additional points of diversion if any: _____

4. Water will be used for the following purposes:

Amount 3.2 for Irrigation purposes from 4/1 to 11/1 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated:

a. 3.2 cubic feet per second and/or b. _____ acre-feet per annum.

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. 150 hp. Turbine pump

b. Height of storage dam _____ feet, active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet, materials used in storage dam: _____

Period of year when water will be diverted to storage _____ to _____ inclusive.
(Month/Day) (Month/Day)

c. Proposed well diameter is 12 inches; proposed depth of well is 200 feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 1 years (minimum 1 year - maximum 5 years).

8. Description of proposed uses:

a. If water is not for irrigation:

(1) Give the place of use of water: _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$ of Section _____ Township _____

Range _____ B.M.

(2) Amount of power to be generated: _____ horsepower under _____ feet of head.

(3) List number of each kind of livestock to be watered _____

(4) Name of municipality to be served _____, or number of families to be supplied with domestic water _____

If water is to be used for other purposes describe: _____

MICROFILMED

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
6N	41E	10	40	40	40	40													160

Total number of acres to be irrigated 160

c. Describe any other water rights used for the same purposes as described above. 22-2186

9. a. Who owns the property at the point of diversion Applicant

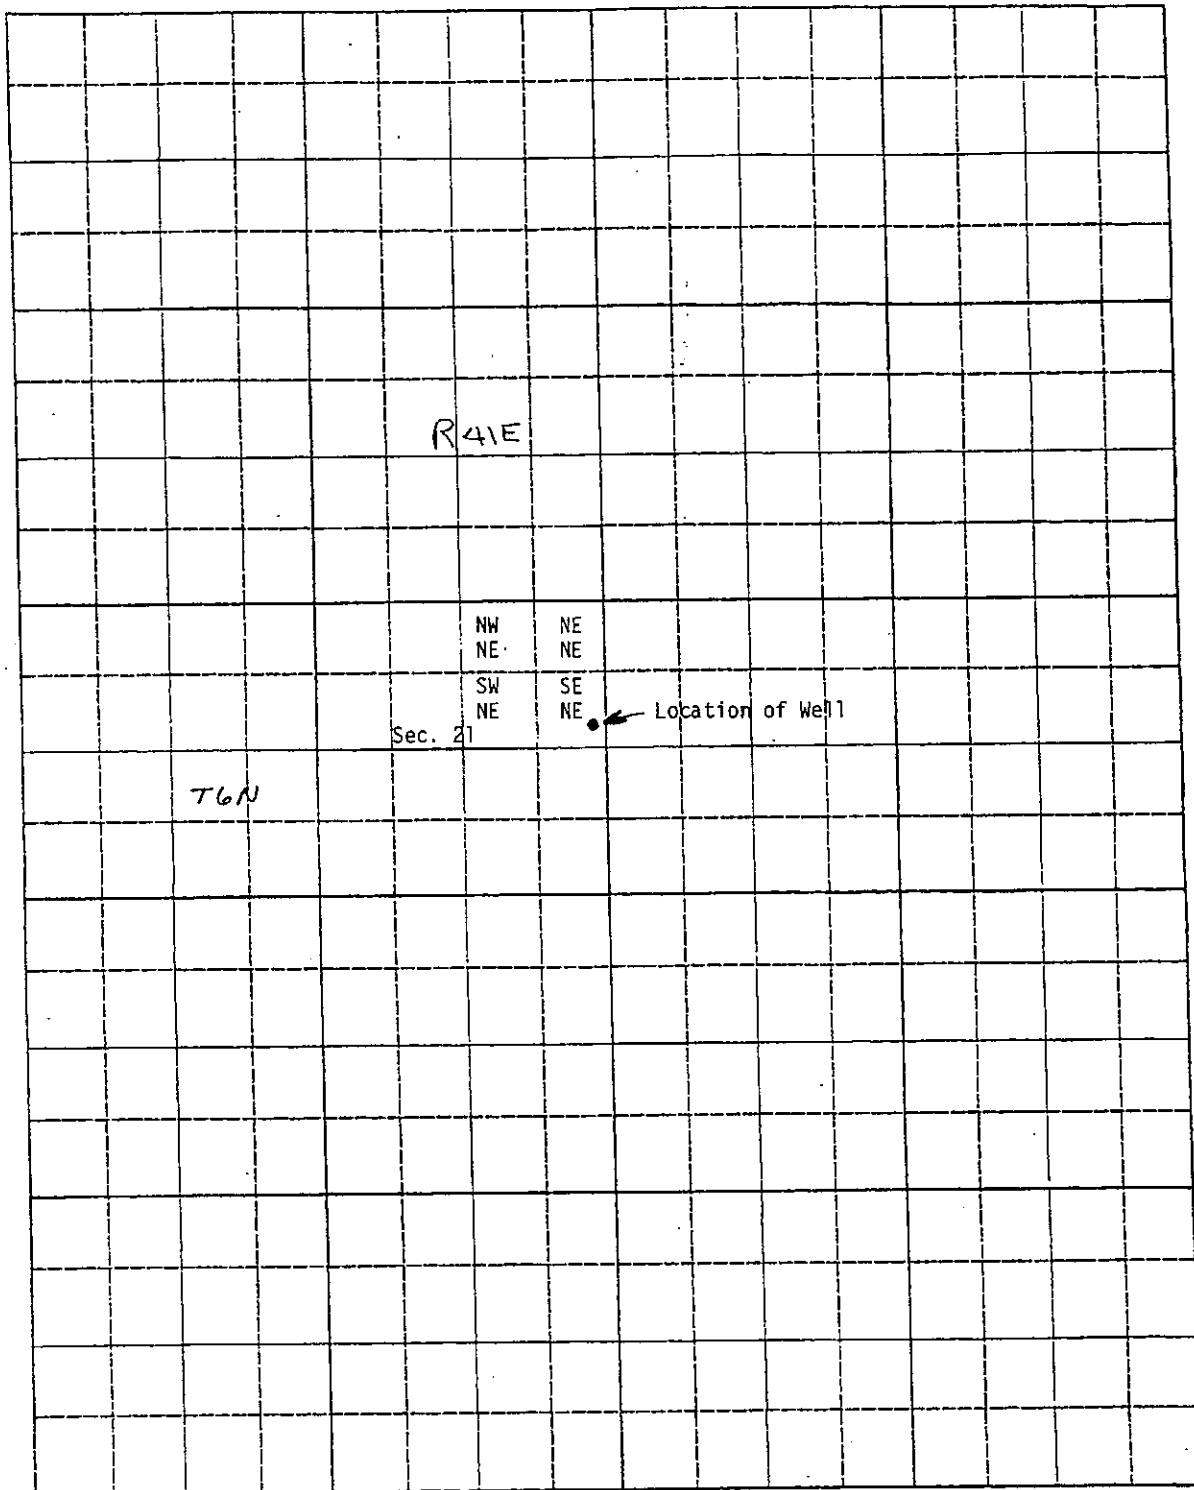

b. Who owns the land to be irrigated or place of use Applicant

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing

10. Remarks

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 22-7397, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before July 1, 19 83.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Witness my hand this 24th day of June, 1982.

D. FLOW MEASUREMENTS

☐ Additional Data Sheets Attached

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
Manometer #1						
ANNUBAR		Dieterich	7517316-55	091409	7.981	
Eagle Eye		DIETERICH	67C	09146	10.02	

2. Measurements:

Manometer Reading = $41.8 - 7.7 = 34.1$

Eagle Eye Reading = 36"

Pressure = 72 psi

ID = 7.981"

Static H₂O Level 320'

E. FLOW CALCULATIONS

☒ Additional Computation Sheets Attached

1. Measured Method:

9 Lines x 32 birds x $\frac{5 \text{ gal}}{\text{min}} \div 448.9 = 3.21 \text{ cfs}$

LIMIT TO 0.02 cfs/ac
Q = 3.16 cfs

2. Alternate Method for Checking Purposes:

Theoretical $Q_{\text{cfs}} = \frac{200 \times 8.814 \times .82}{320' + (2.308 \times 40)} = 3.51 \text{ cfs}$

F. PUMP EFFICIENCY DATA (Optional)

Discharge Pressure: _____ psi x 2.31 = _____ ft (1); Dynamic pumping level: _____ ft (2)

Total Head: (1) + (2) = _____ (3)

: Flow rate: _____ cfs (4)

Water HP: (3) x (4) ÷ 8.8 = _____ (5)

Meter Input KW: 3.6 x _____ KH x _____ CTR or _____ MULT x _____ PTR x _____ N/ _____ T = _____ (6)

Meter Input HP: (6) x 1.34 = _____ (7)

Panel Input KW: _____ Ave PF x _____ Ave Volts x _____ Ave Amps x .001732 = _____ (6)

Panel Input HP: (6) x 1.34 = _____ (7) Efficiency: (5)/(7) x 100 = _____ %

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 158 \times 3.5 = 553$

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 3.16 \times 214 \times 1.9835 = 1341.3$

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 553 \text{ ac-ft}$

2. Volume Calculations for Other Uses:

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 22-07397

Priority: May 20, 1982

Maximum Diversion Rate: 1.97 CFS
Maximum Diversion Volume:¹ 553.0 AF

This is to certify, that LAYNE HARRIS
P.O. BOX 63
NEWDALE, ID 83436

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated April 30, 1982; and has submitted Proof of Beneficial Use on July 21, 1983. An examination indicates that the works have a diversion capacity of 3.210 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/01 to 11/01	1.97 CFS	553.0 AF

LOCATION OF POINT(S) OF DIVERSION: SENE, Sec. 10, Township 06N, Range 41E
MADISON County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
06N	41E	10	NENE 40	NWNE 40	SWNE 40	158
			SENE 38			

Total number of acres irrigated: 158

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.0 afa per acre for the lands above.

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 22-07397

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this 28th
day of FEBRUARY, 19 90.

Acting for

R. Keith Higginson, Director

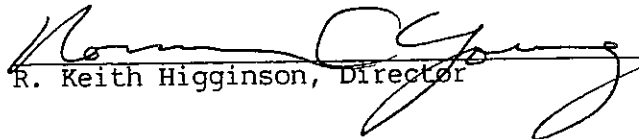

Exhibit F

State of Idaho

WATER LICENSE

Water license No. G-29086 Priority October 17, 1960 Amount 3.57 c.f.s.

THIS IS TO CERTIFY, that Packer Farm Corporation of Bethburg, Idaho, made application for a permit to appropriate the public waters of the State of Idaho, dated October 17, 1960, that Permit G-29086 was issued pursuant to said application; that the proposed works were completed on or about June 1961 with a storage or carrying capacity of 3.57 c.f.s., said works consisting of well, pump and motor; and that on October 19, 1965 proof was made to the satisfaction of the State Reclamation Engineer, of the beneficial use of 1285 acre feet per season, with a maximum rate of diversion of 3.57 cubic feet per second of the waters of ground water, tributary of _____, for the purpose of Irrigation from April 1 to October 31 and for _____ from _____ to _____; and for _____ from _____ to _____; and that the use of said waters has been made in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer and entered in the records of the Idaho Department of Reclamation; the point of diversion is located in NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 11, T. 5 N., R. 41 E., S.M., and other additional points _____, in the County of Madison; and that the amount of water to which such right is entitled and which is hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes and shall not exceed 1285 acre feet per year.

Description and location of place of use:

TWP.	RANGE	SEC.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				TOTAL
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4
