Department of Water Resources
900 N. Skyline Dr. Suite A
Idaho Falls, Idaho 83402-1718

ATTENTION: Roger Warner

Dear Roger:

In answer to your letter of 13 June 2006 and later phone conversation, I am addressing the information contained in your letter.

- 1) The primary water source is the drainage from the mountains to the west of our property plus the drainage from Rainbow Farms Ditch and the water from Williams Creek.
- 2) In checking this water source for the past thirty years, there seems to more than enough water for our needs.
- 3) There is only one neighbor who is affected and I have talked with him and there /5 No problem there.
- 4) This is not applicable.
- 5) This is drainage water on our ranch with no public interest.
- 6) This water runs directly to the Salmon River which is adjacent to our property. We will be flood irrigating with this water and it will go back into the river.
- 7) There will no impact on the economy of the watershed.

Sorry that we are so late getting this to you. If you have further questions, please let me know.

Sincerely,

RECEIVED
