Subject: Amended Application for Transfer (Water Right No. 73-2160)
Application for Transfer (Water Right Nos. 73-12124/12129/12137)

Dear Dave,

An *Application for Transfer* for Water Right No. 73-2160, and the \$330.00 filing fee, was recently returned to this office. IDWR had concerns that the proposed use might be on federal land and additional questions about overlapping surface water rights.

We are sorry about the confusion concerning the place of use and encroachment on land owned by the USDI-Bureau of Land Management. The applicant has confirmed the pivot design submitted for our review showed an approximate location of the new pivot. The applicant does not intend to irrigate federal public land. We have adjusted both the shapefile for the new pivot and the land list description to take care of this confusion. The enclosed amended transfer application corrects the land list and associated map.

After further review of IDWR records, we agree a companion transfer for the overlapping surface water rights is necessary. You will find an additional *Application for Transfer* enclosed which seeks to change the place of use for surface water rights 37-12124, 37-12129 and 37-12137, with the \$570.00 filing fee.

Thank you for your time on this one. Please let me know if there are any other questions concerning these applications.

Sincerely,

Roxanne Brown
