

MEMORANDUM

Date: May 19, 2008
To: Transfer 74777 File
From: Jana Jones
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer #74777 proposes to add two points of diversion from Goat Creek to two existing water rights that authorize the diversion of 0.28 cfs for the irrigation of 7.1 acres on land located approximately 0.7-0.8 mi. south and 1.5-1.7 mi. west of the HWY 75 and HWY 21 junction at Stanley. In total three diversions (one existing and the two new) located approximately 0.7-0.8 mi. south and 1.5-1.7 mi. west of the HWY 75 and HWY 21 junction will be used after the transfer. The existing irrigation system will still service the property but transfer will enable rights to be diverted from all three PODs.

· **Authority to File:**

The applicant is listed as current owner of the rights being transferred according to IDWR records.

· **Water Right Validity:**

The rights (71-4055B and 71-10854) involved with this transfer were decreed in the SRBA on 3/16/1999 and recent aerial photos show the place of use as being irrigated.

· **Injury to Other Water Rights:**

None anticipated.

· **Enlargement of Use:**

None anticipated.

· **Local Public Interest:**

Application will be subject to public notice and protest

· **Beneficial Use/Conservation of Water Resources:**

Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
