Re: For completing Permit 82-7187 to a license appropriate the Public Waters of the State of Idaho.

At this time the Department of Idaho Water Resources (IDWR) is in the process of licensing the Permit #82-7187 however, before the process can be completed and additional information will be needed.

Please review the condition number 3 on Permit 82-7187. Condition; (Measuring devices of a type approved by the Department shall be permanently installed and maintained at the point of diversion and the point of effluent discharge.) At the time of the Beneficial Use Field Exam the point of diversion and the point of effluent discharge did not have measuring devices. The Department of Water Resources is informing Bureau of Land Management that permit # 82-7187 is not meeting this requirement.

Options:

1. The Bureau of Land Management can install the measuring devices to meet the requirement of this permit. If this option is chosen please supply the Department of Idaho Water Resources with documentation of the installation of the measuring devices.
2. Request to the Department of Idaho Water Resources in written form explaining in detail why the Bureau of Land Management would like to remove this condition from this permit. If this option is chosen please supply the Department of Idaho Water Resources with documentation of this request.

Once the department receives this additional information, the processing of this license can continue. If you have any questions, please call me at 208-762-2800. Please respond to IDWR within the next 14 days.

Sincerely,

Chad Goodwin
Senior Water Resource Agent
Northern Region
