

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name: RON STOOR
Address: 300 KNOB HILL CRT
EAGLE ID 83616
208-939-6075
2. Source: GROUNDWATER
3. Location of Point of Diversion: NESE Sec. 29, Township 05N, Range 01E
ADA County
4. Water will be used for the following purposes:

Purpose	From	To	CFS	(or)	AF
IRRIGATION	03/15	11/15	0.060		
DOMESTIC	01/01	12/31	0.040		
5. Total quantity to be appropriated is:
0.100 CFS (and/or) AF
6. Proposed diverting works:
 - a. Description of ditches, flumes, pumps, headgates, etc.
WELL, PUMP
 - b. Height of storage dam feet; active reservoir capacity
acre-feet; total reservoir capacity acre-feet; period of
year when water will be diverted to storage: to inclusive.
 - c. Proposed well diameter is 6 inches; proposed depth of well is 325
feet.
 - d. Is groundwater with a temperature greater than 85F being sought? NO
 - e. If well is already drilled, when? 07/01/1994
Drilling Firm
Well was drilled for APPLICANT
7. Time required for the completion of the works and application of
the water to the proposed beneficial use is 1 year(s).
8. Place of Use: IRRIGATION

TWN	RGE	SEC	ACRES	ACRES	ACRES	TOTAL
05N	01E	29	NESE	02		2

Total number of acres irrigated: 2

Place of Use: DOMESTIC

TWN RGE SEC
05N 01E 29

9. a. Who owns the property at the point of diversion?
APPLICANT
b. Who owns the land to be irrigated or place of use?
APPLICANT
c. If the property is owned by a person other than the applicant,
describe the arrangement enabling the applicant to make this filing.

10. Remarks:

11. Map of proposed point of diversion and place of use attached? ☒

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Ron E. Jones

RE: Held Application for Permit #63-12341- filed 06/13/96

Dear Applicant:

As you aware, the above reference application for permit located in the Boise River Basin has been held by our agency since the 1990s. The Department began holding new groundwater applications for consumptive use due to prolonged drought and concerns about declining aquifer levels. As a result, the Treasure Valley Ground Water Study was initiated. The study was completed in 2002, and now provides modeling for projecting future groundwater availability in the valley. Our agency will commence processing held applications as staff resources are available.

Attached is a proof profile of your application as submitted to our agency. You must still have full possessory interest- ownership in the listed point of diversion and place of use land locations for processing consideration. Please check carefully the specifics on the application. Your applications will need to have public notice published in the local county newspaper. The notice will be published once per week for 2 consecutive weeks. Anyone having issue with an application may file a protest within the time allowed.

The application lists the point of diversion in Township 05N, Range 01E, Section 31. Ground water less than 200 feet depth at this location is considered tributary to the Boise River. Surface water in or tributary to the Boise River upstream of Star bridge is fully appropriated. This means that a new appropriation of ground water would potentially injure a senior Boise River surface water right. Our agency can not process your application unless one of the following can be satisfied:

- 1. An acceptable mitigation plan is filed to mitigate for ground water use that would otherwise cause injury to senior water rights from the Boise River. An example might be the purchase and retirement of an equivalent Boise River surface right*
- 2. The application proposes to appropriate ground water deeper than 200 feet below ground surface. Applications meeting this criteria shall be evaluated on a case-by-case basis in accordance with applicable water laws and rules.*

Page 2.
Application

We are asking for you to convey your intentions regarding the application by completing the attached response form. Please respond to the following:

- If you desire to develop the water use, and wish our agency to complete the processing of your application, please mark the *YES* response. Also, mark the choice needed to meet the Boise River shallow ground water criteria. A consultant list is enclosed if you need assistance.

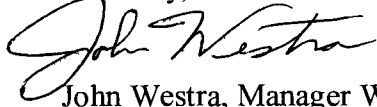

OR

-Mark the *NO* response to withdraw the application. The application will be removed from processing and our records. Our agency will not be able to provide refunds of fees for withdrawn applications.

-Sign, date, and return the response. Response forms need to returned to this office no later than 30 days of this letter date.

Should you have questions about the history or further processing of this application, please contact Denise Buffington or John Westra at the Western Regional Office, phone 334-2190.

Sincerely,

A handwritten signature in black ink that reads "John Westra". The signature is fluid and cursive, with the first name "John" and last name "Westra" clearly distinguishable.

John Westra, Manager Western Region

RE: Application for Permit No. 63-12341

Dear Applicant:

Your application for permit to appropriate ground water for irrigation purposes was received on 6/13/1996. Processing of your application must be delayed.

Due to continued drought and to protect existing water rights and water supplies, the Director of this agency declared a moratorium on 5/15/1992 concerning water right applications proposing new consumptive uses of public water. The moratorium has been lifted, but processing of all new or pending applications has been suspended until technical data are available from a comprehensive Treasure Valley ground water study now underway. Initial results of the study will not be available for at least one year.

To facilitate handling of your filing once it can be processed, please provide the following:

- 1) What is the proposed depth(s) of the water bearing zone(s) to be developed within the aquifer? For example, a well with total depth of 250 feet might be developed with a water bearing zone in the 140-190 feet depth interval. For more information on the appropriate water bearing zone for your well, you might contact a licensed well driller or review well drilling reports available at this office.
- 2) Are the acres already irrigated from a surface water source? If so, what is the source of the water, and how is the water delivered? For example, you may own shares in Farmer's Union Canal Co. for delivery of Boise River water, or you might operate a private pumping system from an unnamed drain or stream.

This office will hold your application and will begin processing as soon as possible. All applications received will be processed in priority order. Delays related to department actions do not affect the date of priority or seniority of your application, once established.

If you have any questions, please feel free to contact this office at 334-2190.

Sincerely,

Cindy Hodges
Sr. Water Resource Agent
