Ms. Phyllis Sellmer
Panhandle Health District
8500 N Atlas RD
Hayden, ID 83835

Dear Ms. Selmer:

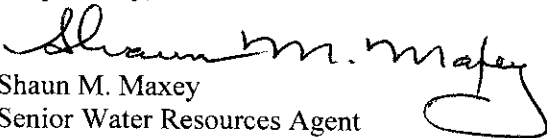

Thanks for the information you provided earlier this week about the Brunner Water Association (BWA). This information has been very helpful for completing a Field Examination that will allow BWA's Water Right Permit 96-9306 to be converted to a license. This letter seeks clarification concerning the correct owner for Public Water Supply (PWS) Number # ID1280302.

The attached PWS number listing indicates PWS number ID1280302 has been assigned to the Morgan Estates Water Association (MEWA) and that the point of contact is Mr. Robert Stipek. The enclosed Idaho Secretary of State records indicate that Mr. Stipek was a BWA officer in 2007 and that both BWA and MEWA are active Idaho corporations.

BWA's current Water Right Permit 96-9306 will be converted to a license after completion of the Field Exam later this summer. PWS numbers may qualify BWA and/or MEWA for municipal water rights and are shown on IDWR license certificates. Review of the enclosed IDWR permits shows that both BWA and MEWA have active permits that were issued for different wells (Points of Diversion) and with different Places of Use (POU).

Please be advised that IDWR water right numbers for the above permits will change due to a redrawn boundary between Basin 95 and Basin 96. I am available at the IDWR Northern Region office at (208) 762.2816 or via e-mail at shaun.maxey@idwr.idaho.gov if you have any questions.

Respectfully,

Shaun M. Maxey

Ms. Gwen Hecket
Brunner Water Association, Inc.
32950 Neighbor CT
Athol, ID 83801

Dear Ms. Hecket:

This letter provides follow-up on our recent telephone conversation concerning completion of the Field Examination for Water Right Permit 96-9306 for the Brunner Water Association (BWA).

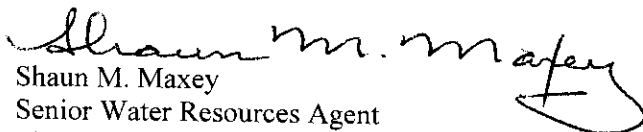

The Idaho Department of Water Resources (IDWR) does not have current information on the static water level depth or submersible pump horsepower for the BWA Well. The enclosed information from files at the Panhandle Health District shows old information about the well before the recent work on the well by R.C. Worst. New information is required to complete accurate well output calculations for the IDWR Field Examination.

IDWR records the Public Water Supply (PWS) number for a municipal provider on a license on the date the license is issued. PWS Numbers are assigned by the Idaho Department of Environmental Quality (DEQ). I have sent the enclosed letter to the Panhandle Health District, and will contact DEQ if necessary, to determine if separate PWS numbers are needed for BWA and the Morgan Estates Water Association (MEWA).

I have attached IDWR water right documents, Idaho Secretary of State corporation records, and a page from a Public Water Supply (PWS) list maintained by DEQ. Review of the IDWR records shows that both BWA and MEWA have active permits that were issued for different wells (Points of Diversion) and with different Places of Use (POU). The corporation records indicate that both BWA and MEWA are active Idaho corporations. The DEQ page shows that PWS # ID1280302 has been assigned to MEWA with a point of contact who is a member of your association.

Please e-mail me at shaun.maxey@idwr.idaho.gov or call (208) 762.2816 with any questions.

Respectfully,

Shaun M. Maxey
