Here is a revised map with more accuracy as to where the wells are and also the additional services are in the yellow squares. But do not know the QQ's also as you can see the well locations are the blue dots. I found the water license permit # you were looking for on permit # 86-7054 I will call and give these to you thanks any question call

Sam~

Find attached a revised exhibit depicting the City of Deary in greater detail. The existing service area is shown in an orange dashed line. You can indicate additional or new quarter-quarters (QQ) that are now within the City of Deary service area by placing a large "X" through the QQ. I have shown the City's two wells as being located in the NW quarter of the SW quarter of Section 24, T40N, R2W per our phone conversation. However, for well diversions IDWR likes to have the description nailed down to the QQQ, any chance you can tell me which quarter of the NW quarter of the SW quarter the wells are located in?

You also indicated you had no record of permit 86-7054. I have attached a copy of the approved application (which is the permit) and the Proof of Beneficial Use notice submitted to IDWR by the City of Deary. If you look at the approved application you will see that the location of the point of diversion (POD) or well is described as being located in the SE of the SE of Section 24, T40N, R3W. However, as we have discussed this is not correct. Because the POD was filled out incorrectly I will need to send you an Amendment of Permit form for you to sign and return to me. Once this is completed I will issue the water right license 86-7054 to the City of Deary.

Thank you.
