RE: APPLICATION FOR PERMIT NO. 63-12592

Dear Mr. and Ms. Anderson:

Your application for permit to appropriate ground water for a consumptive use was received on 6/7/2000. Processing of the application must be delayed.

Due to continued drought and to protect existing water rights and water supplies, the Director of this agency declared a moratorium on May 15, 1992 concerning water right applications proposing new consumptive uses of public water, regardless of source. The moratorium was lifted in May 1995, but application processing was subsequently suspended until technical data was available from the Treasure Valley Hydrologic Study. This study has been completed, but the processing hold on water rights in the Treasure Valley will not be lifted until a plan has been developed to determine a prudent way to issue water rights.

This office will hold your application and will resume processing as soon as possible based on the above considerations. Applications received will be processed in priority order. Delays related to department actions do not affect the date of priority or seniority of an application. You may circumvent this processing hold by submitting a mitigation plan for this application. If you choose to submit mitigation, I would recommend that hire a consultant to put together the necessary elements of an acceptable mitigation plan.

Please contact me at 334-2190 if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Daniel A. Nelson'.

Application No.
(if known)

 IN LOCAL PUBLIC INTEREST

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

 PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

 X WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.

RE: Held Application for Permit #63-12592--Filed 06/06/00

Dear Applicant:

As you aware, the above reference application for permit located in the Boise River Basin has been held by our agency since the 1990s. The Department began holding new groundwater applications for consumptive use due to prolonged drought and concerns about declining aquifer levels. As a result, the Treasure Valley Ground Water Study was initiated. The study was completed in 2002, and now provides modeling for projecting future groundwater availability in the valley. Our agency will commence processing held applications as staff resources are available.

Attached is a proof profile of your application as submitted to our agency. Please check carefully the specifics on the application. You must still have full possessory interest-ownership in the listed point of diversion and place of use land locations for processing consideration. Your application will need to have public notice published in your local county newspaper. The notice will be published once per week for 2 consecutive weeks. Anyone having issue with an application may file a protest within the time allowed.

We are asking for you to convey your intentions regarding this application by completing the attached response form. *Please respond to the following:*

- If you desire to develop the water use, and wish our agency to complete the processing of your application, please mark the *YES* response, provide any updates/changes needed, and list the water bearing zone for the well source.

OR

-Mark the *NO* response to withdraw the application. The application will be removed from processing and our records. Our agency will not be able to provide refunds of fees for withdrawn applications.

-Sign, date, and return the response. Response forms need to returned to this office no later than 30 days of this letter date.

Should you have questions about further processing of this application, please contact Denise Buffington or John Westra at the Western Regional Office, phone 334-2190.

Sincerely,

John Westra, Manager Western Region
