

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name: LAVAR THORNTON 208-922-5779
Address: 2800 S TEN MILE
KUNA ID 83634
2. Source: GROUNDWATER Trib. to:
3. Location of Point of Diversion: Lot 1 (NENWNW), Sec. 7, Township 01N, Range 01E
ADA County
4. Water will be used for the following purposes:
- | Purpose | From | To | CFS | (or) | AF |
|------------|-------|-------|-------|------|----|
| IRRIGATION | 03/15 | 11/15 | 3.250 | | |
5. Total quantity to be appropriated is:
3.250 CFS (and/or) AF
6. Proposed diverting works:
- Description of ditches, flumes, pumps, headgates, etc.
WELL, PUMP AND PIPELINE.
 - Height of storage dam feet; active reservoir capacity
acre-feet; total reservoir capacity acre-feet; period of
year when water will be diverted to storage: to inclusive.
 - Proposed well diameter is inches; proposed depth of well is
feet.
 - Is groundwater with a temperature greater than 85F being sought? NO
 - If well is already drilled, when?
Drilling Firm
Well was drilled for
7. Time required for the completion of the works and application of
the water to the proposed beneficial use is 5 year(s).
8. Place of Use: IRRIGATION

TWN	RGE	SEC		ACRES		ACRES		ACRES	TOTAL

1. Name of applicant LaVar T Mornton Phone 922-5779

Post office address 2800 S. Ten Mile, Kuna, ID 83634

2. Source of water supply Ground water which is a tributary of N/A

3. Location of point of diversion is NE $\frac{1}{4}$ of NW $\frac{1}{4}$ of NW $\frac{1}{4}$, Govt. Lot 01

Sec. 7 Township 1N Range 1E B.M. Ada County; additional

points of diversion if any: SENE; NWNW, Sec. 1, T1N, R1W; SWNE, Sec. 6, T1N, R1E
6.5 6.4

4. Water will be used for the following purposes:

Amount 3.25 for Irrigation purposes from 3/15 to 11/15 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated is (a) 3.25 and/or (b) ~~2.15~~
cubic feet per second acre feet per annum

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. Three drilled wells now in service.

One additional well to be drilled to fill out the balance of the existing
irrigation needs.

b. Height of storage dam N/A feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.

c. Proposed well diameter is 16 inches; proposed depth of well is 500 feet.

d. Is ground water with a temperature of greater than 85°F being sought? No

e. If well is already drilled, when? _____; Drilling firm _____

Well was drilled for (well owner) _____

7. Time required for the completion of the works and application of the water to be proposed beneficial use is

5 years (minimum 1 year).

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in KW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; show name of municipality. _____
- Domestic; show number of households. _____
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: *D* for *Domestic*) in the corresponding place of use below. See instructions for standard symbols.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
- e. Other:

SUPPLEMENTAL INFORMATION APPLICATION FOR PERMIT

The below information is submitted to comply with rules under Section 4.5, Additional Information Requirements, as required by the Water Appropriation Rules and Regulations adopted by the Idaho Department of Water Resources.

1. Rule 4,5,3,1,2. - The only wells within a ½ mile radius of the proposed new well site belong to the applicant and are utilized under existing water right licenses or permits 63-07993, 63-03368, 63-03280 and 63-07933.
2. Rule 4,5,3,2,1. - The application is for 5.02 cubic feet per second which will complete the acquisition of a full water supply in the amount of one miners inch per acre for the 835 acres encompassed under the existing rights as enumerated above. While the full miners inch per acre is not necessary during all of the irrigation season, it often times is necessary for a significant portion of the months of June, July, August and September. Depending upon the crops raised and the irrigation system utilized, the diversion rate will range from approximately 5/8 of a miners inch per acre to one miners inch per acre during the irrigation season. In this area of Idaho, the average use period generally is consistent with the irrigation season of March 15 to November 15, again depending upon the type of crop raised. The amount of water that is anticipated to be consumptively used from the water supply is approximately 1,850 acre feet per year.
3. Rule 4,5,3,2,2. - The source of the water supply is the regional aquifer lying within and below the basalts in southwestern Ada County. This aquifer system is prolific and good water production is obtained from wells constructed properly in both the lower sections of the basalt and in the sands and gravels lying both between basalt beds and just below the main basalt body. Well production in excess of 2,000 gallons per minute is not uncommon and specific capacities for many wells are in excess of 15 gallons per minute per foot of drawdown.
4. Rule 4,5,3,3,1. - Attached is documentation that the applicant has a possessory interest in the property to eliminate any challenge of speculation or delay. Additionally, the property is presently being farmed and has been farmed for many years by the applicant.
5. Rule 4,5,3,4,1. - Sufficient financial data are attached to demonstrate a full financial capability of the applicant to complete the project as anticipated.
6. Rule 4,5,3,4,2. - No plans or specifications are submitted with this application but may be provided if the Department feels they are necessary. These plans and specifications are not submitted since the only addition to the existing system that will occur over the entire 835 acres is the construction of one new well and a short section of mainline to tie into the existing irrigation system. It is not intended to have plans and specifications drawn up for the drilling of the well or the mainline installation since typical well constructions are standardized enough that they are unnecessary and much of the work on the mainline system will be done by the applicant.

If additional data are required by the Idaho Department of Water Resources relating to any of the above mentioned categories, please feel free to contact me directly or Sherl L. Chapman of Sherl L. Chapman Consulting, Inc.

☒ Yes, I intent to proceed with the water use development outlined in the application. I retain full possessory interest in the listed point of diversion and place of use locations on the application. I request the Department continue processing the application. (Please describe on the back updates/changes needed on your application)

(Please fill in) The estimated (well) water bearing zone will be 200 ft to 600 ft below the ground surface.

☐ No, I do not wish to proceed with final processing of this application. I hereby withdraw my Application for Permit to Appropriate the Public Water of the State of Idaho

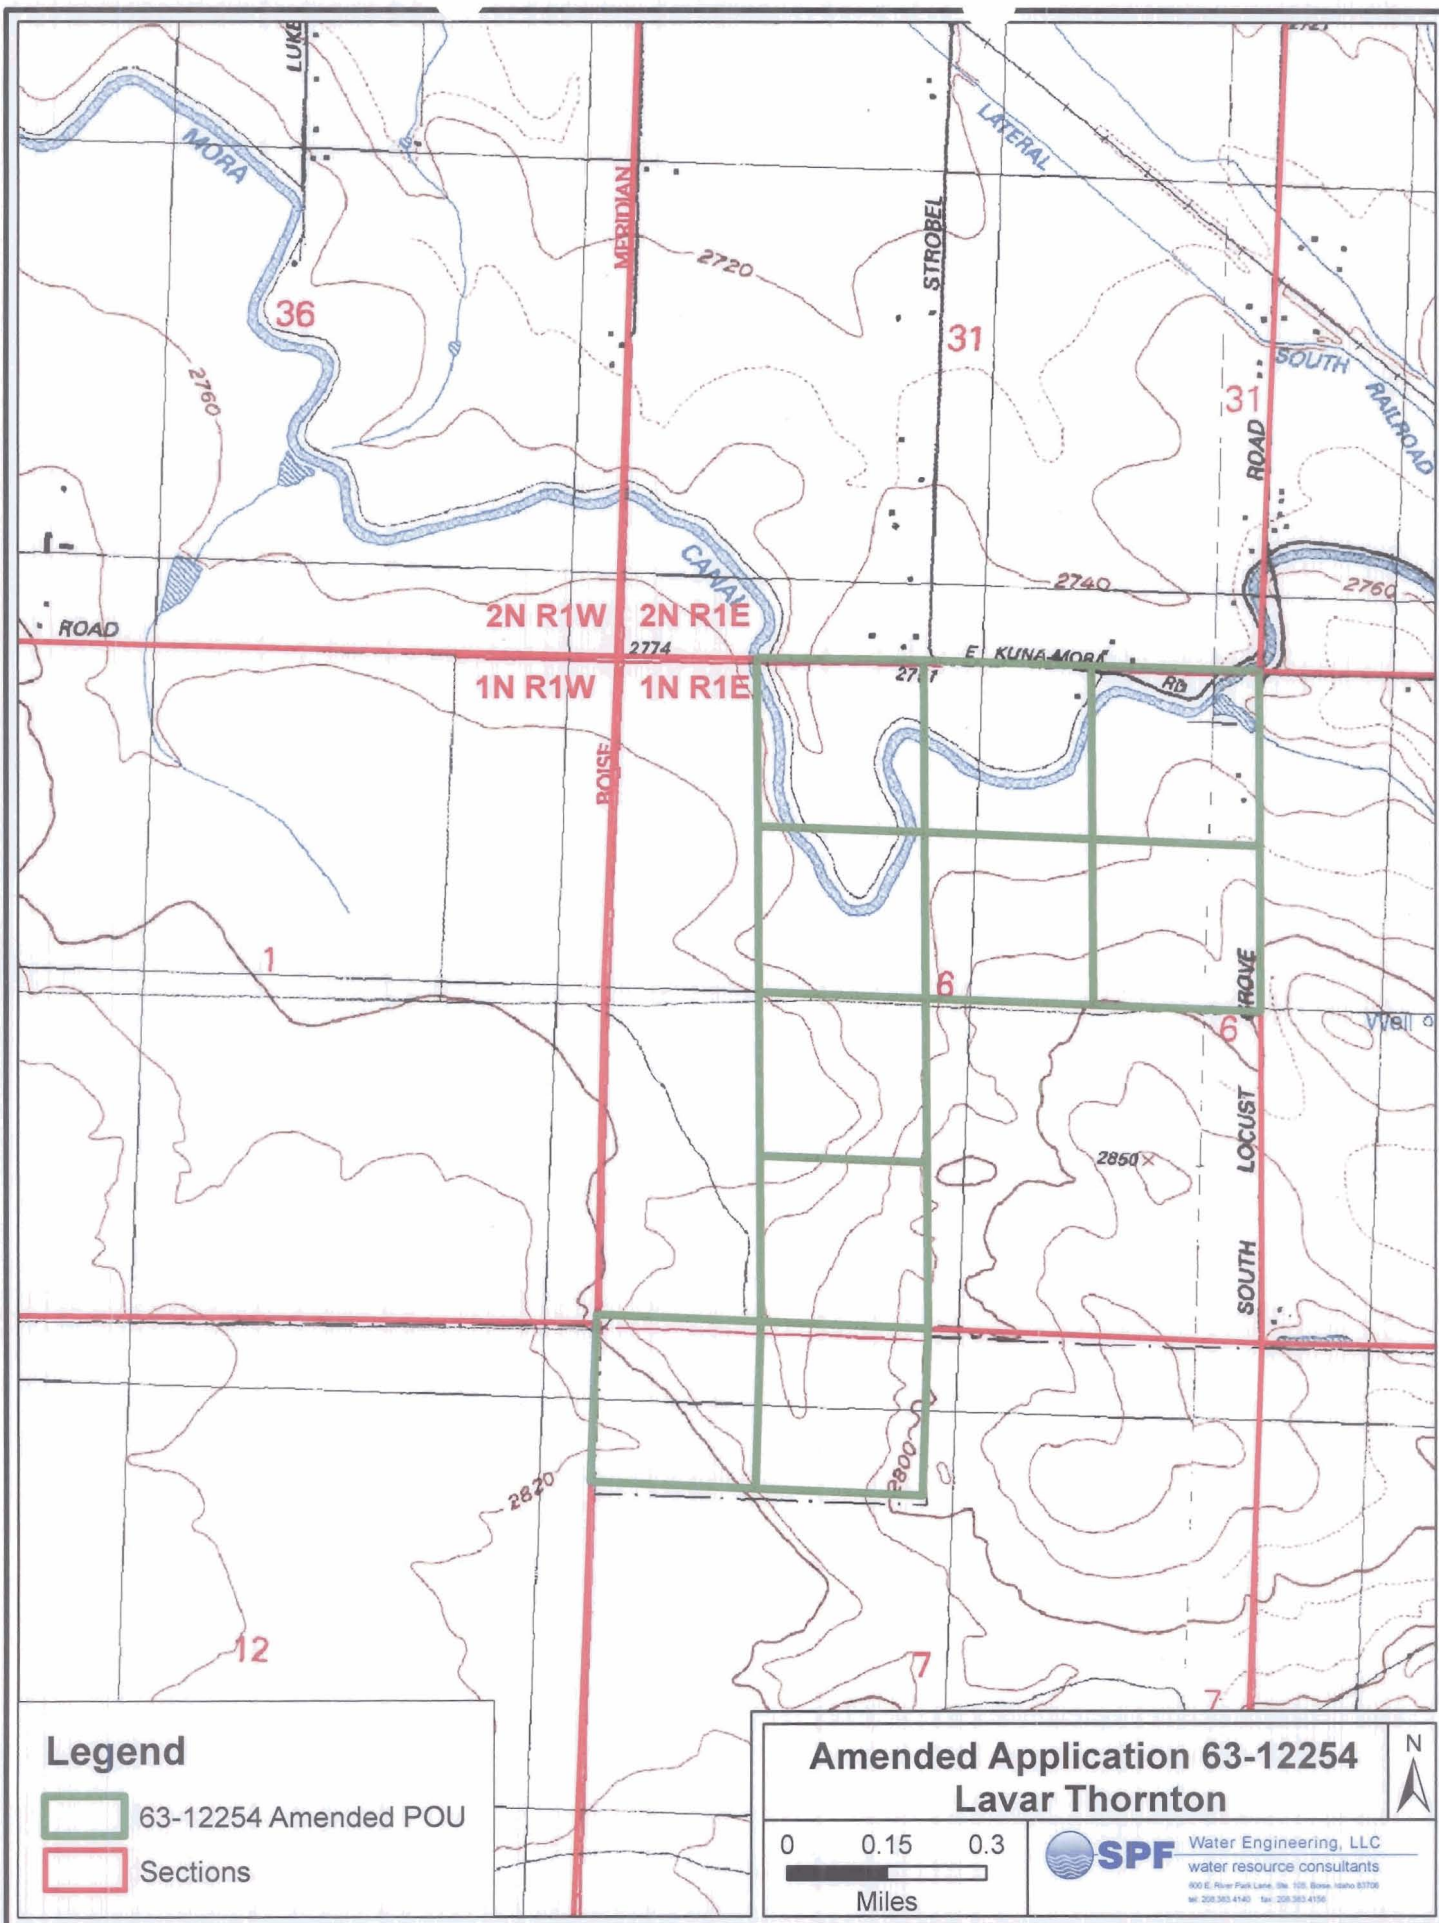

Signed this 6 day of June 2008

RE: Lavar Thornton

Dear Mr. Dreher:

Our valued customer, Lavar K. Thornton, has requested this letter be written detailing his banking relationship with First Security Bank. We understand that he has applied to the Department of Water Resources for a permit to drill a well and provide the main line and irrigation systems.

Mr. Thornton has maintained deposit accounts with First Security Bank for over 20 years. The accounts have always been handled satisfactorily. In addition, operating lines of credit have been granted to Mr. Thornton and repayment has been as agreed. I am assured that Mr. Thornton has the necessary resources to drill the well and provide the main line.

Sincerely,

A handwritten signature in black ink, appearing to read "Norm Jensen", written over a horizontal line.

RE: TRANSFER AND WATER RIGHT APPLICATIONS FOR THORNTON PROPERTY

Dear Sherl:

As we recently discussed, the Thornton water right package can be enhanced by filing a transfer application to add a new well to four water right licenses while three new applications for permit are pending. The permit applications await the processing delay due to the recent lifting of the Boise River basin portion of the Snake River (drought) Moratorium.

Enclosed please find a transfer application and supporting water right and SRBA claim reports for the four licenses to be changed. Any discrepancies between the licenses and SRBA claims should be addressed at the time of filing the transfer. Perhaps the claims just need to be amended to reflect the licenses, or maybe the claims are correct and more accurately reflect the actual state of the water rights, in which case the licenses can now be updated via the transfer process. The transfer application fee is \$100.

The four licenses eligible for a transfer application include numbers 63-03280, 63-03368, 63-07933, and 63-07993.

The water right applications for permit that will be held as mentioned are identified below for future reference. Please provide the existing and proposed water bearing zones relative to the four wells regarding the three permit filings.

- a) 63-12253 for 139 acres in Sections 31 and 36; and
- b) 63-12254 for 540 acres in Sections 1, 6, and 7; and
- c) 63-12255 for 295 acres in Sections 1 and 6.

I'll be glad to help out in this process -- just give me a call.

Sincerely,

Steve Lester
Water Rights Supervisor

RE: Held Applications for Permit #63-12211—Filed 05/11/95
#63-12253--- Filed 06/02/95
#63-12254--- Filed 07/31/95
#63-12255--- Filed 07/31/95

Dear Applicant:

As you aware, the above reference applications for permit located in the Boise River Basin has been held by our agency since the 1990s. The Department began holding new groundwater applications for consumptive use due to prolonged drought and concerns about declining aquifer levels. As a result, the Treasure Valley Ground Water Study was initiated. The study was completed in 2002, and now provides modeling for projecting future groundwater availability in the valley. Our agency will commence processing held applications as staff resources are available.

Attached is a proof profile of your applications as submitted to our agency. Please check carefully the specifics on the applications. You must still have full possessory interest-ownership in the listed point of diversion and place of use land locations for processing consideration. Your applications will need to have public notice published in your local county newspaper. The notice will be published once per week for 2 consecutive weeks. Anyone having issue with an application may file a protest within the time allowed.

We are asking for you to convey your intentions regarding the applications by completing the attached response form. *Please respond to the following:*

- If you desire to develop the water use, and wish our agency to complete the processing of your application, please mark the *YES* response. Also, provide any changes or updates that are needed for the application.

OR

-Mark the *NO* response to withdraw the application. The application will be removed from processing and our records. Our agency will not be able to provide refunds of fees for withdrawn applications.

-Sign, date, and return the response. Response forms need to returned to this office no later than 30 days of this letter date.

Should you have questions about further processing of this application, please contact Denise Buffington or John Westra at the Western Regional Office, phone 334-2190.

Sincerely,

John Westra, Manager Western Region

Subject: Lavar Thornton applications

John,

Lavar Thornton has asked us to help on his 1995 applications. Lavar is interested in moving forward with all four applications and the response forms are included for each. After review, we anticipate amending or assigning some of the applications, as follows:

- 63-12111 no amendment expected; please process as is.
- 63-12253 will amend place of use description so that text & map agree.
- 63-12254 will amend place of use.
- 63-12255 application will be assigned to Layne Thornton; in the meantime, please process as is.

Please contact me with any questions or requests for additional information.

Sincerely,

Scott N. King, P.E.
Senior Project Engineer

Application No: #63-12254

(Please read carefully and mark)

☒ Yes, I intent to proceed with the water use development outlined in the application. I retain full possessory interest in the listed point of diversion and place of use locations on the application. I request the Department continue processing the application. (Please describe on the back updates/changes needed on your application)

(Please fill in) The estimated (well) water bearing zone will be
200 ft to 600 ft below the ground surface.

☐ No, I do not wish to proceed with final processing of this application. I hereby withdraw my Application for Permit to Appropriate the Public Water of the State of Idaho
