Subject: Question on transfer for Bruce and Bruce

Cherie,

As we discussed today on the telephone, transfer #73772 seeks to place water right 65-2614 in a permissible place of use to allow it to be used in a new residential development. The overlapping water rights from other sources (65-2366A from Lone Pine Creek and springs, 65-3402 from a spring) will not be distributed to the new permissible place of use, but will have use within the current place of use. The three water rights should be conditioned to limit their use to a total of 34 acres when used in combination.

Thank you for your time. Please let me know if you have additional questions concerning transfer #73772.
