Denise,

Here are my comments:

- 1) The water from the USBR has been delivered all of their storage for the year 2008 except the 2800 AF past Milner. The exchange needs to be completed by 11/1/2008 as Tony pointed out.
- 2) Water District 1 needs to be notified of storage allocation and the exchange every year. Otherwise, we will likely have some years when the USBR storage does not fill. No exchange will be possible if Black Canyon storage does not fill.
- 3) There is no unallocated storage space in WD1 where the water can be carried over. The storage exchanged can't be carried over if it is not used, unless the USBR has storage space in WD1 available to complete the exchange.

Lyle,

My only comment was to John Holman and Hal Anderson over the telephone that Water District #1 could simply subtract 2,800 AF from the available flow augmentation rental to be delivered past Milner and deliver it instead to the designated diversion(s) above Milner, as was done with the exchange that occurred in 2004. Do we need to have it specified it be delivered above Milner prior to 11/1/2008?

Tony,

Did you get a chance to draft any comments for this proposed exchange?
