

MEMORANDUM

Date: August 04, 2008
To: Transfer 73404
From: Allen Merritt
Re: review and approval

Transfers 72839 and 73404 are related but must be processed sequentially. They have both been processed in parallel with state office staff and to facilitate approval are being approved in the region. Essentially these transfers swap water between owner without drying up any land. They are swapping priorities but to accomplish this one right is being split. In transfer 73404 the rate for 36-7387C is being reduced to mathmatically meet the conditions of combined limit of no more than 0.02 cfs/acre. The rate is reduced from 0.29 cfs to 0.17 cfs.
