Describe what work has been completed toward the development of this water right: **(This must be filled out! If no work has been completed, show "none".**

A new hydro generator was installed last summer, and there was not time for flow measurements because the unit is used only during the summer months to supply power to the government camp when Reclamation's crew is working there. Due to the late winter and snow accumulation this year, Reclamation was not able to start work at Deadwood as early as usual. Therefore, Reclamation is still performing adjustments to the control system and has not been able to do flow measurements. Reclamation plans to complete the necessary adjustments to the control system the week of August 18-22 and perform flow measurement then.

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

See paragraph above.
