Permit To Appropriate Water

NO. 63-11818

Proposed Priority: May 7, 1992 Maximum Diversion Rate: 0.80 CFS

This is to certify, that **JF WATSON FARMS CO**
PO BOX 300
PARMA ID 83660

has applied for a permit to appropriate water from: **GROUNDWATER**
and a permit is **APPROVED** for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
-----------------------	----------------------	--------------------------

IRRIGATION	03/15 to 11/15	0.80 CFS
------------	----------------	----------

LOCATION OF POINT(S) OF DIVERSION:

NWNE , Sec. 7, Township 03N, Range 04W
CANYON County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
03N	04W	7	NWNE	40		40

Total number of acres irrigated: 40

CONDITIONS/REMARKS:

1. This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.
8. This right is subject to all prior rights.

Ident. No. 63-11818

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant J. F. Watson Farms Co. Phone 722-5141
Post office address P. O. Box 300, Parma, Idaho 83660

2. Source of water supply ground water which is a tributary of _____

3. Location of point of diversion is _____ ¼ of NW ¼ of NE ¼, Govt. Lot _____
Sec. 7 Township 3N Range 4W B.M. Canyon County; additional
points of diversion if any: _____

4. Water will be used for the following purposes:

Amount .8 for irrigation purposes from Mar 15 to Nov 15 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated is (a) .8 and/or (b) _____
cubic feet per second acre feet per annum

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. well with pump to booster pump/
mainline/ sprinklers

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.

c. Proposed well diameter is 12 inches; proposed depth of well is 500 (max) feet. } *

d. Is ground water with a temperature of greater than 90°F being sought? No

7. Time required for the completion of the works and application of the water to the proposed beneficial use is
2 years (minimum 1 year).

* per letter with Mr. Watson 5/11/92
'gc

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in KW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; show name of municipality. _____
- Domestic; show number of households. _____
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: *D* for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
3N	4W	7		40															40

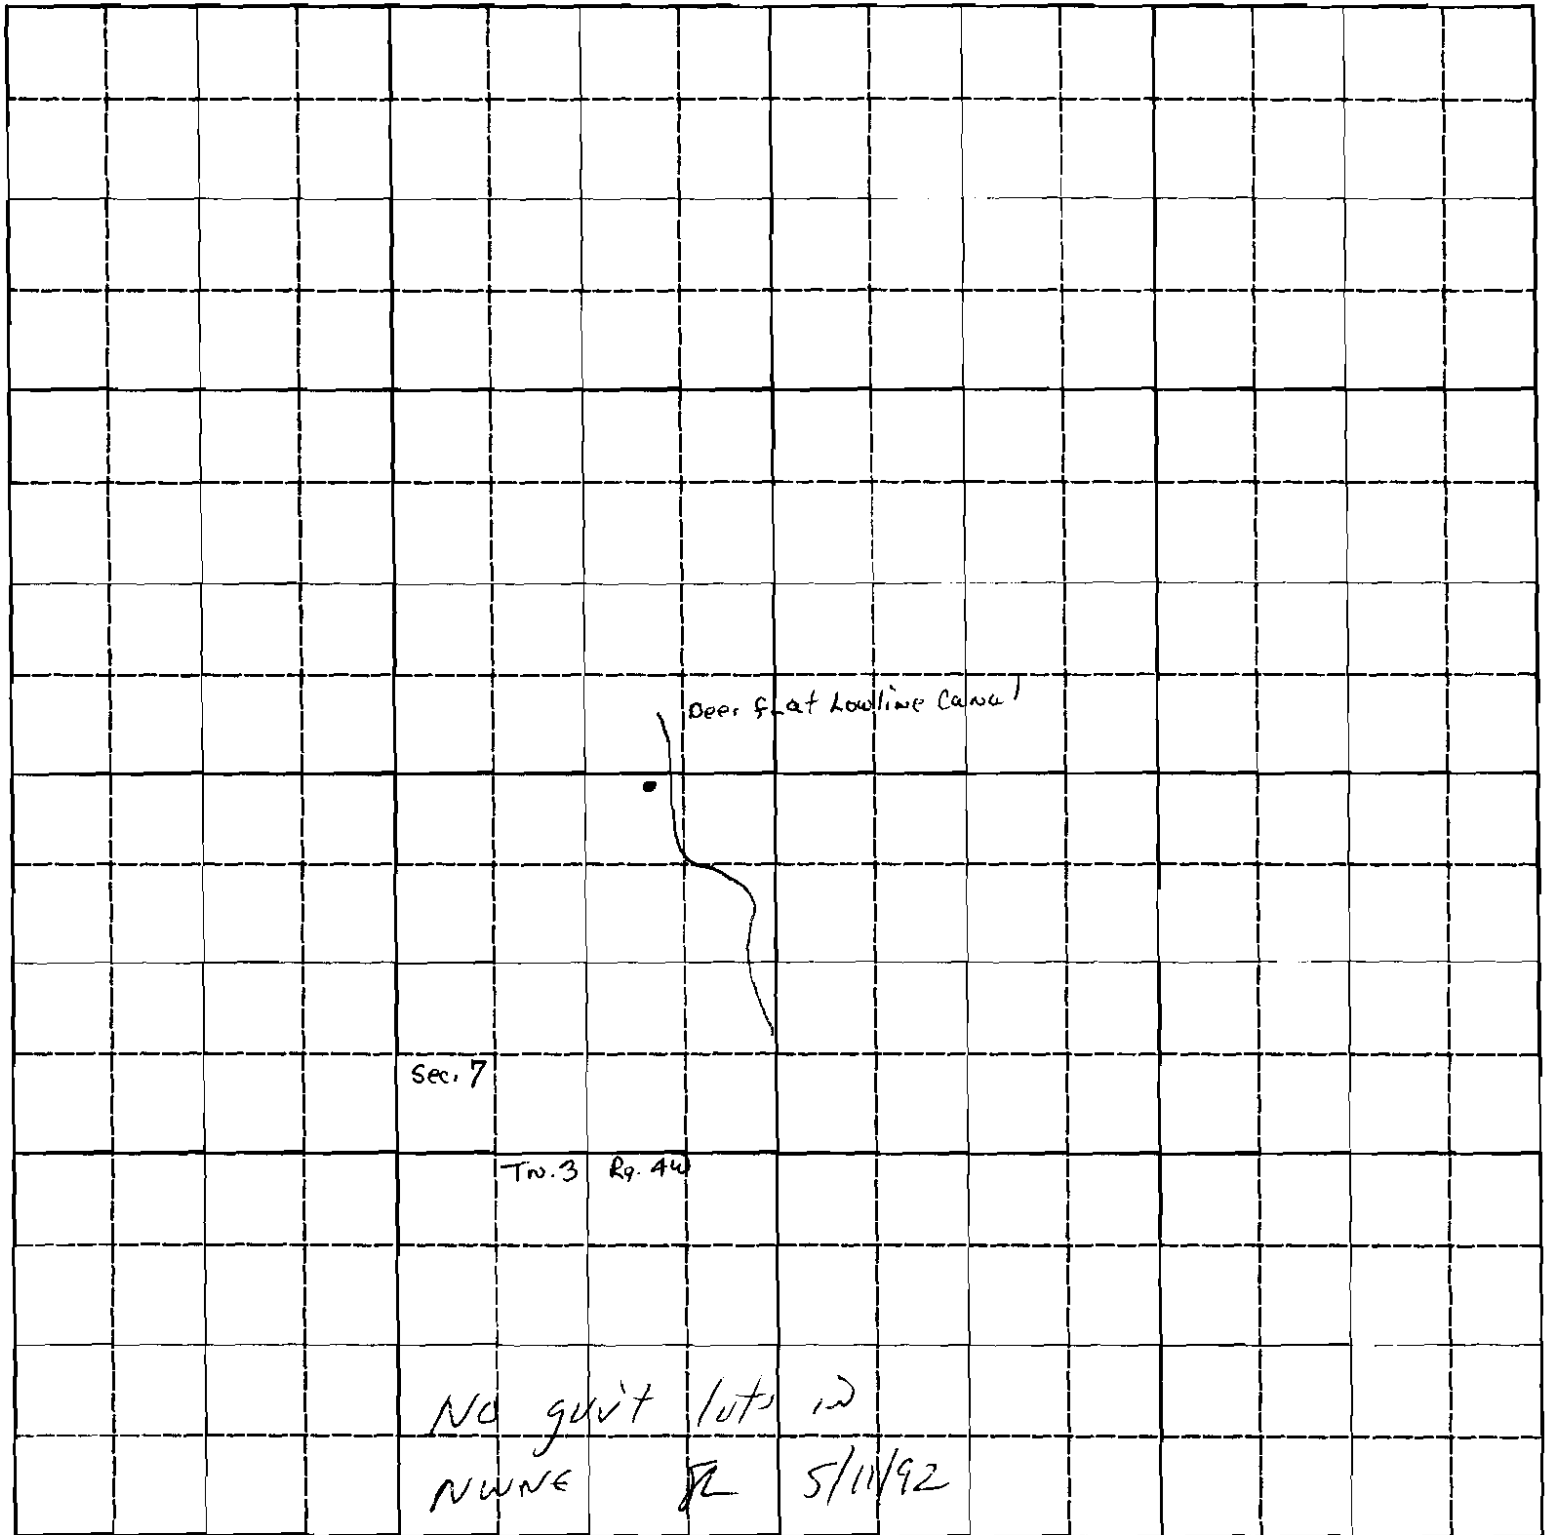

Total number of acres to be irrigated 40

10. Describe any other water rights used for the same purposes as described above. Wilder Irrigation
Boise project

- Who owns the property at the point of diversion? J. F. Watson Farms Co.
- Who owns the land to be irrigated or place of use? J. F. Watson Farms Co.
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing. _____

12. Remarks: _____

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

**Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium**

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

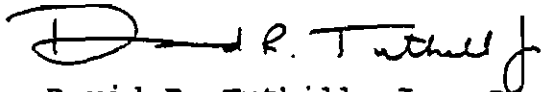

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: Water Right No. M63-11818

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jim Johnson', written over a horizontal line.

JIM JOHNSON, Manager
Water Right Permits Section

JF WATSON FARMS CO
PO BOX 300
PARMA ID 83660

RE: Water Right No. M63-11818

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: DROUGHT EMERGENCY PERMIT NOS. 63-11831 and 63-11818

Dear Mr. Watson:

The department has reviewed your letter to Dave Tuthill dated February 22, 1993 in which you inquire about reinstatement of the above referenced permit for early use during the 1993 irrigation season and about a permanent permit.

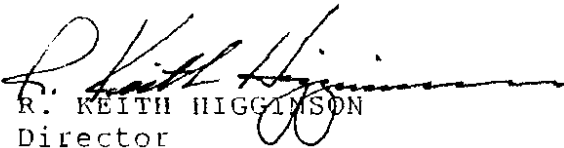

As you know, the moratorium issued by the department on May 15, 1992, against the approval of most new applications seeking to appropriate water, was for the purpose of protecting existing water rights. The moratorium order, however, made exception for the approval of certain uses including:

"applications seeking to appropriate ground water as a supplemental water supply for the irrigation of lands which have an existing normally-full water right from a surface water source".

The permits approved by the department in 1992 for drought emergency relief have expired, thus continued pumping of the associated wells is not authorized unless the department reinstates the permits. If reinstated, the permits can only provide "replacement" water, not additional water during periods when canal water is not usually (or ever) available. The existing moratorium on new development would have to be lifted before additional use of water could be considered for approval.

Please feel free to keep in touch with the department concerning the surface water supply conditions and the department's decision on whether to reinstate the drought relief well permits.

Sincerely,

R. KEITH HIGGINSON
Director

c: IDWR - W. Region

J. F. WATSON FARMS
P.O. BOX 300
PARMA, IDAHO 83660

February 22, 1993

Mr. Dave Tuthill
Dept. of Water Resource
2735 Airport Way
Boise, Idaho 83705

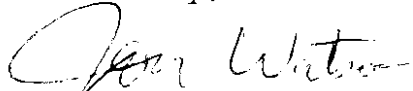

Dear Mr. Tuthill:

This is to request for J. F. Watson Farms Co. a permanent permit to appropriate water with period of use to begin March 1 and to end November 15. This permanent permit would replace the temporary permit No 63-11818. The basis for this request follows.

The primary reason for the above request lies with the drought conditions currently existing for the perenial crop (orchards) this permit applies to. The 1991-92 winter drought seriously affected the fruit production of the orchards because of lack of subsoil moisture content. These conditions still exist based on four foot soil samples recently taken. Recommendations from tree horticulturists have been similar in that the subsoil moisture content must be raised to reverse this trend. The earlier we have access to water in the event that drought conditions continue, the better chance we have of rehabilitating the orchards. Without the early water supply, rehabilitation will not be an option; rather, tree removal will occur.

Contact me at 722-5141 or Marc Asumendi, Fruit Operations Manager, if you require additional information.

Sincerely,

Jon Watson, President
J. F. Watson Farms

Per telecon on March 3, 1993,
Mr. Watson requests permission, even on a
temporary basis, to water trees early
due to dry soil conditions.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved Date 7-24-92

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

THE WELL MUST BE LOCATED AT LEAST 500 FEET FROM ANY EXISTING WELL. WELL SPACING CLOSER THAN 500 FEET MUST BE APPROVED BY THE DEPARTMENT OF WATER RESOURCES PRIOR TO CONSTRUCTION. *IF WELL IS SEALED TO 140' DEEP IT CAN BE DRILLED WITHIN 500 OF AN ADJACENT WELL. M.S.J.*

IF THE WELL IS DRILLED DEEPER THAN 100 FEET, THE SURFACE SEAL MUST CONSIST OF CEMENT OR BENTONITE CLAY GROUT AND EXTEND FROM LAND SURFACE TO A DEPTH OF NOT LESS THAN 75 FEET BELOW LAND SURFACE, OR 5 FEET INTO THE NEXT SIGNIFICANT CONFINING LAYER, WHICHEVER IS GREATER.

EXTENSION OF DRILLING PERMIT

Extension approved by _____ Approval Date _____

This extension is good for 60 days beyond the above extension approval date.

J. F. WATSON FARMS
P.O. BOX 300
PARMA, ID 83660

July 24, 1992

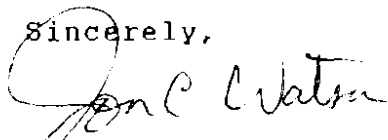

Cloyd Olsen
23289 Homedale Road
Wilder, Idaho 83676

Dear Mr. Olsen:

As I indicated in our phone conversation today, I'm planning to drill a supplementary irrigation well for my orchards. It will be approximately 250 feet from your domestic well.

As you indicated to me your domestic well is a 6 inch cased well, drilled to 137 feet and cased to 132 feet, with a static level of approximately 70 feet. You indicated you would have no objection to me drilling this well provided I cased off all water bearing aquifers below the 140 feet level. I intend on using this well as a supplementary water source to my Wilder Irrigation water and only as a necessary.

Sincerely,

Jon C. Watson
President, J. F. Watson Farms Co.

RE: PERMIT NO. 63-11818

LETTER OF TEMPORARY PERMIT APPROVAL

Dear Permit Holder(s):

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

MAY 26 1992

MORATORIUM EXEMPTION QUESTIONNAIRE

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE COMPLETE AND RETURN THE FOLLOWING: Department of Water Resources

- Has ALL the land you propose to irrigate been irrigated with surface water in the past? Yes
- Do you summer fallow any of your irrigated land? If so, how many acres? No
- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of canal or water district.
Wilder Irrigation Distric Serial #323
- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?
Reduced by drought for normal district operation 6 years.
- What crops have you grown in the past ten years?
Apples, Plums

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

Dated this 22nd day of May, 1992.
