

MEMORANDUM

TO: Transfer No. 75035 File

FROM: Steve Lester 

DATE: August 25, 2008

RE: Evaluation of Sufficiency of Information Submitted

The transfer proposes a simple correction to Transfer 74820 approved on 7/25/08. That previous filing listed an incorrect 10-acre tract for the proposed new well known as Well No. 8. The applicant wants to list the new site in a 40-acre location due to some uncertainty about the exact 10-acre site.

The final order for Transfer 74820 was already in effect by the time the owner learned of this problem, resulting in the need for a new transfer. This problem was encountered late last week during the drilling permit application process for the new well authorized by Transfer 74820.

The contact person for this newest application is engineer Jim Rees at MTC Inc. He handles all the well details for the municipal provider.

Typical information for a transfer review memo is not needed here due to the transfer approved just a few weeks ago. Transfer 74820 was not protested, simplifying processing for this newest filing. A few details are noteworthy for this new transfer application as noted below.

The application is incorrectly completed but can be processed without amending for this simple scenario:

- Pg 1 item A2 does not clearly explain the need for a new transfer
- Pg 1 item B2 should be 3.5 cfs
- Pg 1 item B4 for the second well should be NE of SWNW instead of NW of SWNW
- Pg 3 item A9 states n/a for other rights but should list several others identified in the previous transfer.

I added the note at the bottom of page 1 of the application to highlight this situation despite our standard policy to avoid things like that.

Regional adjudication staff was notified about this transfer for follow up with the Court.

The transfer can be approved at Western Region without parallel processing, legal notice etc. to correct P/D information for the proposed well urgently needed by the municipal provider.
