Re: Application for Permit No. 67-14913

Dear Mr. Ryals:

We discussed processing your application the other day. I reviewed the application and noticed a few items needing attention. Please see the enclosed information – notes, forms and so on.

The application should be amended by completing a fresh form and returning it. An amended application can be processed for legal notices in the first half of next month if it is received by this office by July 29.

Please submit the requested information to allow application processing to continue. You may seek additional time to provide the information by making a written request to delay processing. Your response including the requested information, or a request for more time to seek the information, must be received within the next thirty (30) days. The application will be voided without a timely written reply.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Sincerely,

Steve Lester
Water Rights Supervisor

Enclosure

APPLICATION 67-14913 NOTES

-JZ 2/18/08

See form marked “copy” for items needing attention.

See form marked “amended” to complete, including map.

Original application maps, particularly Google aerial photo, only show about a 5 or 6 acre piece to irrigate instead of 10 acres.

See IDWR map attached to blank form marked “amended”:

- Blue line is your 22 acre parcel
- Yellow line is $\frac{1}{4}$ $\frac{1}{4}$ line
- Mark well location, mark maximum acres to be irrigated.

If want to irrigate more than 5 or 6 acres as you marked on original map, make sure amended application map reasonably agrees with maximum number of acres to be covered – does not have to be exact but should not be map with about 5 acres and application form with about twice as many acres.

Item 3, diversion – will well be in SWSE or SESW? Whatever is written on the form should agree with the map. The original application listed SWSE but the maps did not indicate which $\frac{1}{4}$ $\frac{1}{4}$ the well would be in.

Item 4 & Item 5, amount of water (also see Item 9 & 13):

- Up to 5 acres at 0.03 cfs/acre maximum (little bit more per acre for up to 5 acre parcels)
- 6 or 7 acres at 0.02 cfs/acre maximum, 0.12 or 0.14 cfs
- More than 7 up to 10 acres, 0.15 cfs ok (don't have to file for maximum 0.02 cfs/acre)
- Above choices covered by \$100 fee you paid, receipt enclosed.

Item 9, place of use – correct total number of acres, correct number per $\frac{1}{4}$ $\frac{1}{4}$, reasonably agrees with map.

Item 10 – need response, appears from research that answer is “none.”

Item 13 – map, marked as noted above so point of diversion and place of use agree with written description on amended application.
