Re: Annual Volume Calculation

Annual Volume Calculation:

There is no annual volume calculation on the original 2002 Field Exam. The Ross Point Water District Manager, Dan Selden, indicated in a phone call to IDWR Northern Region that there are currently 1572 hookups on the District water system and that the District does not separate the type of hookup by type of user (domestic, commercial, etc.). Mr. Selden also faxed a list to IDWR Northern with well production data for a 300 day period for the week ending September 6, 2007 through the week ending July 3, 2008. (Well production data attached to Field Exam report)

$1572 \text{ hookups} \times 1.2 \text{ AFA (Domestic and Irrigation)} = 1886.4 \text{ AFA}$

$267,615,500 \text{ Gallons (Supplied by District)} \div 300 \text{ days} = 892051.6667 \text{ Gallons Per Day (GPD)}$

$892051.6667 \text{ GPD} \div 325,850 \text{ (Gallons in 1 Acre Foot)} = 2.737 \text{ Acre Feet per Day (AFD)} = 2.74 \text{ AFD}$

$2.74 \text{ AFD} \times 365 \text{ days per year} = 1000.1 \text{ Acre Feet Per Year} = 1000 \text{ AFA}$

Re: Overlap Analysis

Overlapping Water Rights With 95-9009 (Ross Point Water District)

The following water licensed water rights overlap partially or completely with the Service area for the Ross Point Water District. One water right (95-8477) held by Ross Point Water District provides for 2.51 CFS & 925.0 AFA. The District also controls water rights 95-4088 and 95-7258. A review of backfile records available in Workflow indicate most of the water rights listed below provide for irrigation water rights on agricultural lands that are being developed and which have been added to the District service area.
