RE: Beneficial Use Reports for Water Right Permit Nos. 37-8136, 37-8532, and 37-20834

Dear Dr. Brockway:

On September 6, 2007, the Department of Water Resources received beneficial use field reports completed by you for water right permit nos. 37-8136, 37-8532, and 37-20834. However, the reports do not provide sufficient information to evaluate the annual volume of water applied to beneficial use under each permit during the authorized development periods. Pursuant to Rule 35 of the Beneficial Use Examination Rules, IDAPA 37.03.02, please provide the additional information requested below.

Please describe and quantify: the location and size of the waste water infiltration pond(s); the number of gravel washing facilities; the amount of water used in each gravel washing facility operating under normal conditions; the annual volume of water beneficially used in washing gravel and sand, washing trucks, filling water trucks, the shop, and general clean-up needs throughout the plant area.

The annual volume recommended in each report is assuming a continuous year-round diversion at the maximum flow rate recommended for each permit. The annual volume of water for each permit must be evaluated individually with regard to the amount of water applied to beneficial use during the authorized development period of the permit. Please provide a quantification of the annual volume of water applied to beneficial use as authorized under each permit within thirty (30) days pursuant to Rule 35.02.c. of the Beneficial Use Examination Rules.

If you have any questions, please contact me at (208) 287-4943.

Sincerely,

Aaron Marshall
Sr. Water Resource Agent
