Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Ms. Morris:

The Idaho Department of Water Resources is returning your recently submitted application for additional information and clarification.

Item #3 Location of the Points of Diversion

You are applying for 3 points of diversion. Two of the points are identified on the submitted map by two circled X's, which are located in the SW of the NE quarter of Section 4, Township 49 North, Range 2 East. It's not clear where the third point of diversion is located. There is another X shown on the map, which is located within the SE of the NE quarter, also of Section 4. The application, however, describes the point of diversion as being in the NE of the SE of Section 4. Please confirm the location of the third point of diversion on the map as well as on the application.

Item #9 Place of Use

The map submitted does not adequately describe the location of the acreage to be irrigated. On the enclosed aerial photograph please outline the areas to be irrigated. The area outlined in yellow represents approximately 14 acres; I'm not sure where the remaining 41 acres are to be located.

Also, you will need to indicate, in Item #9, which quarter quarter's the domestic and commercial uses will be located in, by placing the letters C and D in the appropriate box or boxes.

Once the corrections are made and the additional information acquired, please return the application and aerial photograph to me, within the next 30 days so as not to delay processing. If you have any questions, don't hesitate to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent
