Re: Water Right Transfer Application
Project No.: 96-03-2008

Dear Mr. Swank:

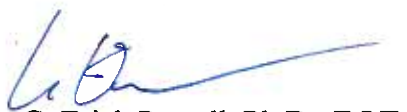

Enclosed with this cover letter is an application for transfer of water right nos. 35-2751B, 7477C, 8002B, 8195B, and 8338B. These water rights, owned by Monty and Carolene Funk, have been decreed for a total of 232 acres. The Funks have entered into a land lease agreement (enclosed) with Calvin and Pamela Dyer, who own 80-acres of land immediately to the east of the land irrigated with the water rights listed above.

The intent of this transfer is to create a permissible place of use of approximately 314 acres. The PPU has a place of use that includes the historical decreed land and the leased 80-acres. Ultimately, two pivots will be installed to irrigate 116 acres apiece for a total of 232 acres.

The area affected by this transfer is located within the model boundaries for the Eastern Snake Plan Aquifer. No changes are proposed to the point of diversion and the PPU is located in the same ESPA model cells as the decreed water rights. No change to the ESPA model was calculated.

If you have additional questions, please do not hesitate to contact our office.

Sincerely,

G. Erick Powell, Ph.D., E.I.T.
