RE: Requested Information for The Woodlands at Bill's Island Application

Dear Sharla:

This letter is in response to your letter dated January 28, 2008. In that letter, you requested the following information relative to the Application for Permit we filed for The Woodlands at Bill's Island, LLC: "The point of diversion was not provided correctly. You list only two points of diversion, but you state on page two that there may be as many as four. We have to know for sure how many wells you are going to have. As far as the 42 homes you plan on having ½ acre of lawn and garden with each home."

As to the first question you pose, there is the possibility of four points of diversion on the property, but we are not sure at this point how many actual wells will be drilled. In the event four wells are drilled, two of them would be located in the NWNE, T13N., R42E., Section 25, and two wells would be drilled in the NENE, T13 N., R42E., Section 25. Through the permitting process, we would like to have the flexibility of having the four points of diversion as a possibility, but understand that once the permit is developed, the points of diversion may actually be fewer than the four which we have requested. We hope this provides you the information you need. If you find it necessary for us to amend the Application for Permit in some way to indicate the four points of diversion on the first page of the application form, please let us know, but we note that we have listed the two quarter-quarter sections where the possible four points of diversion would be located.

In regards to the second question, we do plan on having ½ acre of lawn and garden with each home.

We hope this answers your questions relative to this Application for Permit. If you have any additional questions, please let us know.
