RE: Permit # 63-32546

Dear Deborah;

This is a follow up to our phone conversation about the use of a pump for Mr. Erskine.

I met with Dan on Friday June 20, 2008 at his home and reviewed his request to pump from the slough on his property. After review my recommendations are as follows.

1. Mr. Erskine should not be required to install a lockable controlling works as the pump is located on his property and must be fueled before it can operate.
2. I would request that Mr. Erskine submit to my office a monthly report of the total quantity in gallons per hour used as rated on his pump.

These requirements seemed acceptable to Mr. Erskine when we discussed this at the site.

Please contact me with any questions.

Sincerely,

Rex R. Barrie
Watermaster
