6. **If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7.** If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

Water right 61-7233 is for a series of small catchments created to retain water for stockwatering use. The volume of the individual catchments is unknown. We suggest the diversion volume for the water right splits described by this Change in Ownership be shown as 10 AFA on each right, with a Condition limiting the two rights to 10 AFA together.

Water right 61-11836 is for instream stockwatering use from Bowns Creek. We suggest the diversion rate for the water right splits described by this Change in Ownership be shown as 0.02 cfs on each right, with a Condition limiting the two rights to 0.02 cfs together.
